Board 1 — Configure the Membership ProductBoard 2 — Operate the Member & Membership Lifecycle

Area 13 — Membership & Annual Pass Management

Board 1 — Membership & Annual Pass Product Configuration

The screenshot displays the TICVAI Board 1 - Membership & Annual Pass Product Configuration interface, which is divided into 10 screens. The interface includes a sidebar with navigation options such as Dashboard, Commercial Pricing, Pricing Rules, Tax, Fees & Calculation, Pricing Governance, Dynamic Pricing, AI Signals & Intelligence, Simulation & Optimization, Ticket Upgrade & Conversion, Order & Reservation, 13 Membership & Pass, 13.1 Command Center, 13.1.1 Product & Tier Builder, 13.1.2 Eligibility Builder, 13.1.3 Validity & Activation, 13.1.4 Entitlement Builder, 13.1.5 Usage Rules, 13.1.6 Family & Dependent, 13.1.7 Commercial & Channel, 13.1.8 Renewal & Continuity, 13.1.9 Validation & Publish, Reports & Analytics, Settings, and Collapse.

The main content area shows the following screens:

- 13.1.1 Membership & Annual Pass Command Center:** Displays key metrics for Active Memberships (48), Annual Pass Products (27), and Family Memberships (18,732). It also shows Expiring in 30 Days (8,614), Renewal Entitled Products (32), and Suspended Products (2).
- 13.1.2 Membership Product & Tier Builder:** Allows configuration of product details, tier structure, and attributes.
- 13.1.3 Membership Eligibility & Qualification Rule Builder:** Configures eligibility rules for different membership types, including age, residency, and customer status.
- 13.1.4 Validity, Activation & Expiry Configuration:** Sets up validity periods, activation methods, and expiry rules.
- 13.1.5 Membership Entitlement & Admission Benefit Builder:** Defines entitlements and admission benefits for different membership tiers.
- 13.1.6 Membership Usage, Visit & Consumption Rules:** Configures usage limits, visit rules, and consumption rules.
- 13.1.7 Family, Household & Dependent Membership Configuration:** Sets up family and dependent membership rules.
- 13.1.8 Membership Commercial, Pricing & Channel Association:** Associates membership products with commercial pricing and channels.
- 13.1.9 Renewal, Auto-Renewal & Membership Continuity Configuration:** Configures renewal rules, auto-renewal settings, and membership continuity.
- 13.1.10 Membership Product Validation, Approval & Publication:** Manages the validation, approval, and publication of membership products.

10 Backend Configuration Screens — Detailed SOW

For Area 13, Board 1 should establish the **configuration engine behind memberships and annual passes**. It should define what the membership/pass is, who can purchase it, how long it is valid, what it provides, how it activates, how family/dependents work, and how renewal is governed.

The architecture should be:

Membership Product → Membership Type/Tier → Eligibility → Validity & Activation → Entitlements & Benefits → Usage Rules → Member/Dependent Structure → Commercial Association → Renewal Rules → Publish

We should keep a strict boundary:

- **Ticketing Catalogue** owns the underlying sellable product/catalogue structure.
- **Area 10** owns pricing, discounts, tax and fees.
- **CRM** owns the master customer profile.
- **Loyalty** owns points/earn/burn mechanics.
- **Wallet** owns stored value.
- **Access Control** validates admission.
- **Area 13** owns the **membership/pass contract, lifecycle, entitlement and membership-specific rules**.

13.1.1 — Membership & Annual Pass Command Center

Purpose

Provide administrators with a centralized view of all membership, annual pass, season pass and subscription-style admission products.

KPI Cards

Display:

- Active Membership Products
- Annual Pass Products
- Draft Products
- Active Members
- Family Memberships
- Memberships Expiring Soon
- Renewal-Enabled Products
- Suspended Products
- Products with Configuration Issues
- Average Membership Duration

Product Directory

Display:

- Product ID
- Membership Name
- Type
- Tier
- Venue/Attraction
- Validity
- Activation Method
- Renewal
- Family/Individual
- Current Members
- Effective Dates
- Status
- Owner

Membership Types

Support configurable types such as:

- Annual Pass
- Season Pass
- Monthly Membership
- Fixed-Term Membership
- Corporate Membership
- Family Membership

- Individual Membership
- Student Membership
- VIP Membership
- Custom Membership

Statutes

Support:

Draft / In Review / Approved / Scheduled / Active / Suspended / Expired / Retired

Configuration Health

Identify:

- Missing Entitlements
- Missing Pricing Association
- Missing Validity
- Invalid Eligibility
- Conflicting Rules
- Missing Renewal Policy

Quick Actions

- Create Membership
- Clone
- Edit
- Preview
- Submit for Approval
- Publish
- Suspend
- View Members

AI Assistance

AI may highlight:

“Premium Annual Pass has a renewal policy but no renewal pricing profile assigned.”

Acceptance Condition

Administrators can view, search and manage the complete portfolio of membership and annual-pass products from one workspace.

13.1.2 — Membership Product & Tier Builder

Purpose

Configure the fundamental definition and hierarchy of a membership/pass.

Basic Configuration

Capture:

- Membership Name
- Membership Code
- Description
- Membership Type

- Brand
- Venue
- Attraction
- Market
- Currency Context
- Effective From
- Effective To

Tier Configuration

Support:

- Standard
- Silver
- Gold
- Platinum
- VIP
- Custom Tiers

Example:

Annual Pass

- Silver
- Gold
- Platinum

Tier Relationships

Define:

- Tier Level
- Display Order
- Upgrade Path
- Downgrade Path
- Parent Membership
- Replacement Membership

Actual upgrade transaction processing can use Area 11.

Product Characteristics

Configure:

- Individual / Family / Corporate
- Named / Transferable
- Physical / Digital
- Renewable / Non-Renewable
- Auto-Renew Eligible
- Admission-Based / Benefit-Based / Hybrid

Catalogue Association

Link membership configuration to the relevant sellable product in the Ticketing Catalogue.

Versioning

Changes should create governed versions rather than silently rewriting active member contracts.

Acceptance Condition

Administrators can create and version membership products and tiers with clear relationships to the central TICVAI product catalogue.

13.1.3 — Membership Eligibility & Qualification Rule Builder**Purpose**

Determine who is allowed to purchase, activate, hold or renew a particular membership.

Eligibility Dimensions**Rules may evaluate:**

- Age
- Person Type
- Residency
- Country
- Customer Segment
- Corporate Affiliation
- Student Status
- Existing Membership
- Previous Purchase
- Membership History
- Channel
- Venue
- Promotional Qualification

Examples**Junior Annual Pass****Age:**

6–15

UAE Resident Pass

Residency verification required.

Corporate Membership

Approved corporate account required.

Existing Membership Rules**Configure:**

- Multiple Memberships Allowed
- One Membership per Customer
- Mutually Exclusive Memberships
- Prerequisite Membership
- Existing Tier Requirement

Verification**Configure whether qualification requires:**

- No Verification

- Customer Declaration
- Document Verification
- Identity Verification
- Staff Verification
- External Verification

Purchase vs Activation

Allow different rules.

Example:

A parent may **purchase** a Junior Pass, but the pass must be **assigned to an eligible child before activation**.

Rule Testing

Backend users should be able to simulate:

Customer Profile + Product → Eligible / Not Eligible
with an explanation.

Acceptance Condition

TICVAI consistently determines membership eligibility using centrally configured qualification rules and returns an explainable result.

13.1.4 — Validity, Activation & Expiry Configuration

Purpose

Define exactly when a membership becomes valid, how long it remains valid and how it expires.

Validity Methods

Support:

Fixed Calendar

1 Jan-31 Dec.

Duration From Purchase

365 days from purchase.

Duration From Activation

365 days from first activation.

Season Based

2026-2027 season.

Custom Period

Configured start/end.

Activation Methods

Support:

- Immediate on Purchase
- Fixed Start Date
- First Visit
- Manual Activation
- Customer Activation

- Membership Card Collection
- Identity Verification
- Configured Trigger

Activation Deadline

Example:

Must activate within 90 days of purchase.

Expiry

Configure:

- Exact Expiry Date
- End of Day
- End of Season
- Duration
- Grace Period

Future-Dated Membership

Example:

Purchase:

15 November 2026

Membership Start:

1 January 2027.

Backdating

Configure whether authorized staff can backdate activation and under which approval.

Expiry Behavior

At expiry:

- Membership → Expired
- Admission Entitlements Disabled
- Benefits Disabled
- Renewal Window Maintained
- Customer History Preserved

Acceptance Condition

Every membership has a deterministic, configurable activation, validity and expiry lifecycle.

13.1.5 — Membership Entitlement & Admission Benefit Builder

Purpose

Define exactly **what the member receives**.

This is the heart of the membership product.

Entitlement Types

Support:

- Unlimited Admission
- Limited Admissions

- Attraction Access
- Event Access
- Zone Access
- Fast Track
- Priority Entry
- Guest Tickets
- Parking
- F&B Benefit
- Retail Benefit
- Rental Benefit
- Special Event Access
- Booking Privileges
- Other Configured Benefits

Admission Entitlement

Configure:

- Venue
- Attraction
- Event Type
- Admission Type
- Number of Visits
- Period
- Days
- Times
- Timeslots

Example

Gold Annual Pass

Includes:

- Unlimited General Admission
- 4 Guest Tickets/year
- Priority Entry
- 10% F&B benefit
- 10% Retail benefit
- Free Parking

Benefit Limits

Configure:

- Per Day
- Per Week
- Per Month
- Per Membership Year
- Lifetime of Membership

Blackouts

Example:

Guest tickets cannot be redeemed during selected peak dates.

Benefit Dependencies**Example:**

Parking benefit valid only when member has a valid visit on the same day.

Entitlement Ownership**Identify whether the entitlement is:**

- Member Specific
- Family Shared
- Dependent Specific
- Account Shared

Acceptance Condition

Administrators can define the complete admission and benefit package associated with every membership tier.

13.1.6 — Membership Usage, Visit & Consumption Rules

Purpose

Control how membership entitlements may actually be consumed.

Screen 13.1.5 defines **what the member receives**.

Screen 13.1.6 defines **how it may be used**.

Usage Rules**Configure:**

- Maximum Visits per Day
- Maximum Admissions per Period
- Same-Day Re-entry
- Re-entry Cooldown
- Concurrent Reservations
- Advance Booking Limit
- No-Show Treatment
- Cancellation Limit
- Guest Usage
- Benefit Consumption

Example**Annual Pass:**

Unlimited annual visits

but:

Maximum one active reservation per timeslot.

Advance Reservation**Configure:**

- Reservation Required

- Reservation Optional
- Walk-In Allowed
- Maximum Advance Booking Days
- Maximum Active Future Reservations

No-Show Rules

Example:

3 no-shows within 30 days

→ Reservation privilege temporarily restricted.

Re-entry

Configure:

- Unlimited Same-Day Re-entry
- No Re-entry
- Re-entry After X Minutes
- Venue-Specific Rule

Consumption Counters

Maintain counters such as:

Guest Tickets: 4 issued / 2 used / 2 remaining

Parking: 12 uses this year

Access Integration

Access Control should consume the resulting entitlement decision, not recreate membership rules.

Acceptance Condition

Membership entitlement usage is governed consistently across reservation, ticketing and access-control channels.

13.1.7 — Family, Household & Dependent Membership Configuration

Purpose

Support memberships covering more than one person while preserving individual identities and entitlements.

Membership Structures

Support:

- Individual
- Couple
- Family
- Household
- Parent + Child
- Corporate Group
- Custom Group Structure

Roles

Configure:

- Primary Member
- Secondary Adult
- Dependent
- Child
- Guardian
- Authorized Manager

Family Limits

Example:

Family Gold:

- 2 Adults
- Maximum 3 Children

Dependent Rules

Configure:

- Minimum Age
- Maximum Age
- Relationship Requirement
- Verification Requirement
- Same Household Requirement where applicable

Entitlement Model

Support:

Individual Entitlements

Each family member receives their own benefits.

Shared Entitlements

Example:

Family receives 6 guest tickets collectively.

Add/Remove Member Rules

Configure:

- Allowed
- Effective Date
- Frequency
- Fee
- Approval
- Eligibility Revalidation

Age Transition

Example:

Child dependent turns 16.

TICVAI should flag:

“Dependent no longer qualifies under current child rule.”

Possible configured action:

- Grace Period
- Upgrade Required

- Renewal Correction
- Manual Review

Acceptance Condition

TICVAI can manage individual and family memberships with correctly assigned member roles, eligibility and shared/individual entitlements.

13.1.8 — Membership Commercial, Pricing & Channel Association

Purpose

Connect the membership contract to TICVAI's central commercial engines without duplicating pricing configuration.

Pricing Association

Link to:

- Base Pricing Profile
- Membership Tier Price
- Renewal Price
- Upgrade Price Policy
- Promotional Pricing Eligibility
- Tax Profile
- Fee Profile

All monetary calculation remains within **Area 10**.

Channel Availability

Configure sale through:

- B2C
- Mobile App
- POS
- Call Center
- Box Office
- Kiosk
- B2B
- Corporate
- Reseller
- API

Channel Restrictions

Example:

VIP Membership

Available only through:

Call Center + Box Office.

Payment Eligibility

Associate permitted commercial/payment terms such as:

- Full Payment

- Installments where supported
- Corporate Credit
- Auto-Renew Payment

Payment processing remains outside the membership engine.

Membership Discounts

Membership-specific discounts should reference central pricing rules.

Example:

Gold Member:

10% F&B benefit

Area 13 identifies eligibility/benefit.

The applicable commercial engine calculates the transaction.

Sales Period

Configure:

- Always Available
- Fixed Sales Window
- Seasonal Sale
- Invitation Only
- Capacity Limited

Acceptance Condition

Membership products can be commercially sold across authorized channels using centrally governed pricing, tax, fee and payment services.

13.1.9 — Renewal, Auto-Renewal & Membership Continuity Configuration

Purpose

Define how a membership moves from one validity period into the next.

Renewal Modes

Support:

- Manual Renewal
- Customer Self-Service Renewal
- Agent-Assisted Renewal
- Auto-Renewal
- Invitation-Only Renewal
- Non-Renewable

Renewal Window

Configure:

60 days before expiry

through:

30 days after expiry.

Early Renewal

Configure whether:**New Period Starts Immediately**

or

New Period Starts After Existing Expiry

The normal annual-pass model should usually preserve remaining validity.

Renewal Pricing**Associate:**

- Current Membership Price
- Protected Renewal Price
- Renewal Discount
- Loyalty Rate
- Fixed Renewal Rate

Calculation is delegated to Area 10.

Auto-Renewal**Configure:**

- Eligible Products
- Consent Requirement
- Payment Method Requirement
- Pre-Renewal Notification
- Retry Policy
- Failure Handling

Failed Renewal**Possible states:**

Payment Failed → Retry → Grace Period → Manual Action → Expired

Renewal Eligibility**Revalidate where required:**

- Age
- Residency
- Membership Status
- Outstanding Balance
- Qualification
- Corporate Association

Tier Movement**At renewal, configure whether:**

- Same Tier Only
- Upgrade Allowed
- Downgrade Allowed
- Suggested Tier

Acceptance Condition

TICVAI supports governed manual and automatic renewal while preserving membership continuity, commercial terms and required customer consent.

13.1.10 — Membership Product Validation, Approval, Publication & Versioning

Purpose

Provide the final governance layer before a membership/pass configuration becomes commercially available.

Configuration Validation

Before publication verify:

- Product Definition Complete
- Catalogue Association
- Eligibility Rules
- Validity
- Activation
- Entitlements
- Usage Rules
- Pricing Association
- Tax/Fee Association
- Channel Availability
- Renewal Policy
- Required Credential Configuration

Dependency Health

Example:

Gold Annual Pass references an inactive pricing profile.

Family Pass has no dependent eligibility rule.

Auto-renew is enabled without required renewal consent configuration.

Preview

Administrators should preview:

Customer qualifies → purchases → membership activates → benefits assigned → member visits → benefits consumed → membership expires/renews.

Approval Workflow

Support:

Draft

- Review
- Commercial Approval
- Operational Approval where required
- Approved
- Scheduled/Published

Effective Dating

Allow future configuration changes.

Example:

Current Gold Membership:

Version 4 — valid until 31 Dec.

Version 5:

Effective 1 Jan.

Existing member contracts remain associated with the appropriate version according to configured migration policy.

Impact Analysis

Before changing an active configuration, show:

- Active Members Affected
- Future Renewals
- Entitlements Affected
- Channels
- Pricing Dependencies
- Access Dependencies

Publication

Synchronize relevant configuration with:

- B2C
- POS
- Mobile App
- Call Center
- B2B
- Access Control
- Ticketing
- Other dependent services

Audit

Record:

Who → Changed What → Previous Version → New Version → Reason → Approval → Effective Date

AI Configuration Review

AI may identify issues such as:

“The proposed Silver Pass gives unlimited admission but its configured price is below the equivalent four-visit product. Review possible cannibalization before publication.”

This remains advisory.

Acceptance Condition

Only validated, approved and correctly versioned membership configurations can become commercially active, with complete impact and audit history.

Board 1 — Final Screen Register

#	Backend Screen	Core Responsibility
13.1.1	Membership & Annual Pass Command Center	Portfolio management
13.1.2	Membership Product & Tier Builder	Product/tier definition
13.1.3	Membership Eligibility & Qualification Rule Builder	Member eligibility
13.1.4	Validity, Activation & Expiry Configuration	Membership lifecycle
13.1.5	Membership Entitlement & Admission Benefit Builder	Benefits and entitlements
13.1.6	Membership Usage, Visit & Consumption Rules	Benefit usage
13.1.7	Family, Household & Dependent Membership Configuration	Multi-member structures
13.1.8	Membership Commercial, Pricing & Channel Association	Commercial integration
13.1.9	Renewal, Auto-Renewal & Membership Continuity Configuration	Renewal engine
13.1.10	Membership Product Validation, Approval, Publication & Versioning	Governance and publication

Important Architecture Decision

I would specifically freeze the distinction between **Membership**, **Loyalty**, and **CRM**, because otherwise it could easily combine them into one large service.

Membership answers:

“What contractual access and benefits is this person entitled to because they hold this membership/pass?”

Loyalty answers:

“What points, tier status, rewards or earn/burn benefits has this customer accumulated?”

CRM answers:

“Who is this customer, and what is our relationship/history with them?”

A customer can therefore be a **Gold loyalty member without owning an Annual Pass**, or an **Annual Pass holder without having Gold loyalty status**.

That separation will keep TICVAI flexible for attractions, museums, theme parks, sports venues and other clients with different commercial models.

Board 1 is ready to freeze at exactly 10 backend screens. The next step is the Board 1 visual design showing all 10 screens.

Area 13 — Membership & Annual Pass Management

Board 2 — Member Operations, Usage, Renewal & Intelligence

10 Backend Configuration & Operational Screens — Detailed SOW

Board 1 defined **what the membership product is**: tiers, eligibility, validity, activation, entitlements, family structures, commercial associations, and renewal configuration.

Board 2 should manage the actual member after purchase:

Member Created → Membership Product Activated → Credential Assigned → Visits & Benefits Consumed → Account Maintained → Exceptions Managed → Renewal/Upgrade/Downgrade → Retention → Expiry → Complete History

A key architecture boundary should remain:

- **Board 1 = Membership Product Configuration**
- **Board 2 = Member & Membership Operations**
- **CRM = Customer master/profile**
- **Loyalty = Points, rewards, earn/burn**
- **Area 10 = Pricing calculations**
- **Area 11 = Upgrade/conversion transaction engine**
- **Area 12 = Order/payment transaction history**
- **Access Control = Entry validation**
- **Board 2 = operational management of the customer's membership contract**

13.2.1 — Member Operations Command Center

Purpose

Provide membership teams with a real-time operational dashboard for the complete active member population.

KPI Cards

Display:

- Active Members
- New Members Today
- Activated Today
- Pending Activation
- Expiring in 30 Days
- Renewal Due
- Renewed This Month
- Renewal Rate
- Suspended Memberships
- Frozen Memberships
- Membership Exceptions
- At-Risk Members

Member Operational Queue

Display:

- Membership ID
- Member
- Membership Product
- Tier
- Venue
- Activation Date
- Expiry Date
- Membership Status
- Usage Level
- Renewal Status
- Outstanding Issue
- Owner

Membership Statuses

Support:

Purchased / Pending Assignment / Pending Activation / Active / Grace Period / Frozen / Suspended / Expired / Cancelled / Renewed / Replaced

Operational Alerts

Examples:

184 memberships expire within the next seven days.

27 purchased memberships remain unactivated for more than 30 days.

14 family memberships contain dependents requiring eligibility review.

Segmentation

Filter by:

- Venue
- Product
- Tier
- Status
- Member Type
- Activation
- Expiry
- Renewal
- Usage
- Customer Segment
- Acquisition Channel

AI Operational Summary

Example:

“Gold Annual Pass renewal performance is 8.4% below last year's equivalent cohort. Most non-renewals have fewer than three visits during the current membership period.”

Acceptance Condition

Membership operations teams can monitor and prioritize the complete member population from one centralized workspace.

13.2.2 — Member 360° Membership Account Workspace

Purpose

Provide a complete operational view of an individual member and their membership contract.

This should be the primary screen an authorized membership-service agent opens when helping a member.

Member Header

Display:

- Member Name
- Customer ID
- Membership ID
- Membership Product
- Tier
- Status
- Activation Date
- Expiry Date
- Renewal Status
- Primary Venue
- Credential Status

Membership Information

Show:

- Membership Version
- Purchase Date
- Purchase Channel
- Original Order
- Validity
- Activation Method
- Renewal Policy
- Auto-Renew Status

Entitlement Summary**Example:****Unlimited Admission**

Active

Guest Tickets

2 of 4 remaining

Free Parking

18 uses

F&B Benefit

10%

Retail Benefit

10%

Family / Household**Display:**

- Primary Member
- Secondary Adult
- Dependents
- Shared Benefits
- Individual Benefits

Related Transactions**Link to:**

- Original Order
- Payments
- Renewals
- Upgrades
- Refunds
- Membership Changes

Operational Actions**Subject to permission:**

- Activate
- Freeze
- Suspend

- Resume
- Renew
- Replace Credential
- Add Note
- Review Eligibility
- Manage Dependents

AI Member Summary

Example:

“Member has visited 17 times this year, has two unused guest tickets and becomes eligible for renewal in 12 days.”

Acceptance Condition

Authorized users can understand the complete operational state of a membership without navigating across multiple modules.

13.2.3 — Membership Activation, Assignment & Credential Management

Purpose

Manage the operational process that turns a purchased membership product into an active membership assigned to a specific individual.

Activation Queue

Show memberships:

- Awaiting Member Assignment
- Awaiting Identity Verification
- Awaiting Document Verification
- Awaiting Activation
- Activation Failed

Assignment

Associate:

Purchased Membership

→ **Customer / Member**

Required Checks

Depending on Board 1 configuration:

- Eligibility
- Age
- Residency
- Identity
- Photograph
- Required Documents
- Dependent Relationship
- Terms Acceptance

Activation

Display:

- Purchase Date
- Eligible Activation Date
- Activation Deadline
- Selected Start Date
- Calculated Expiry
- Activation Method

Credential Assignment**Associate membership with:**

- Dynamic QR
- Barcode
- RFID
- NFC
- Digital Membership Card
- Wallet Pass
- Physical Card

Actual credential generation should use the Ticket Media/Credential services.

Duplicate Membership Detection**Example:**

“Customer already holds an active Gold Annual Pass.”

Actions depend on configuration:

- Block
- Review
- Replace
- Link
- Escalate

Activation Failure**Record reason:**

- Eligibility Failed
- Missing Documentation
- Duplicate Membership
- Credential Failure
- Configuration Issue
- Other

Acceptance Condition

Purchased memberships can be securely assigned, verified, activated and linked to appropriate credentials according to Board 1 rules.

13.2.4 — Visit, Admission & Entitlement Usage Monitor

Purpose

Provide membership teams with complete visibility of how a member uses admission and other membership entitlements.

Usage Summary

Display:

- Total Visits
- Visits This Month
- Last Visit
- Upcoming Reservation
- Guest Tickets Used
- Guest Tickets Remaining
- Parking Uses
- Benefit Usage
- No-Shows

Visit Timeline

Each visit captures:

- Date
- Venue
- Attraction
- Gate
- Entry Time
- Exit where available
- Credential
- Reservation
- Validation Result

Entitlement Consumption

Example:

Benefit	Allocation	Used	Remaining
Guest Tickets	4	2	2
VIP Events	3	1	2
Parking	Unlimited	18	Unlimited

Usage Exceptions

Detect:

- Usage Above Limit
- Invalid Re-entry

- Benefit Exhausted
- Blackout Attempt
- Expired Membership Usage
- Suspended Membership Attempt

Manual Adjustment

Authorized users may correct entitlement counters where permitted.

Require:

- Reason
- Previous Value
- New Value
- User
- Approval where required

AI Usage Insight

Example:

“This member's visit frequency has decreased by 64% compared with the first six months of membership.”

Acceptance Condition

Authorized users can trace membership visits and benefit consumption while preserving the Access Control system as the authoritative admission-validation engine.

13.2.5 — Membership Freeze, Suspension & Reactivation Management

Purpose

Manage temporary interruption of membership rights without necessarily terminating the membership contract.

Actions

Support:

- Freeze
- Suspend
- Resume
- Reactivate
- Administrative Hold

Freeze vs Suspension

Freeze

Usually a permitted temporary pause requested by the member or defined by membership policy.

Suspension

Administrative restriction imposed due to an operational, compliance, payment, misuse, or other governed reason.

Freeze Configuration Consumption

Board 1 may define general policy, while this screen executes the member-specific action.

Capture:

- Start Date
- End Date
- Duration
- Reason
- Requested By
- Approved By

Validity Treatment**Configure according to product policy:****Extend Expiry**

30-day freeze → expiry extends 30 days.

or:

Do Not Extend

Membership validity continues during freeze.

Entitlement Treatment**During freeze/suspension:**

- Admission Blocked
- Reservations Restricted
- Benefits Restricted
- Renewal Allowed/Blocked
- Credential Disabled

Suspension Reasons**Examples:**

- Payment Issue
- Membership Misuse
- Credential Misuse
- Eligibility Issue
- Chargeback
- Administrative Review
- Other

Reactivation**Before reactivation validate:**

- Suspension Resolved
- Payment Status
- Eligibility
- Credential
- New Expiry if applicable

Acceptance Condition

Authorized users can freeze, suspend and reactivate memberships while correctly updating validity, entitlement and credential state.

13.2.6 — Membership Upgrade, Downgrade & Product Migration Operations

Purpose

Manage operational movement of an active member between membership products or tiers.

Examples

Silver → Gold

Gold → Platinum

Individual → Family

Monthly Membership → Annual Pass

Legacy Annual Pass → New Annual Pass Product

Eligibility

Before migration evaluate:

- Current Membership
- Target Membership
- Customer Qualification
- Usage
- Remaining Validity
- Entitlements
- Outstanding Balance
- Effective Date

Financial Treatment

Board 2 requests the appropriate transaction from:

- **Area 11** for upgrade/conversion logic
- **Area 10** for price difference
- **Area 12** for resulting order/payment

Effective Date

Support:

- Immediately
- Next Visit
- Next Renewal
- Fixed Date
- End of Current Term

Entitlement Comparison

Show:

Benefit	Current	Target
Admission	Unlimited	Unlimited
Guest Tickets	2	6

Benefit	Current	Target
F&B Benefit	10%	20%
Parking	Paid	Free

Consumed Benefits

TICVAI must account for already-consumed entitlements.

Example:

Gold provided 4 guest tickets.

Member already used 3.

Target product rules determine whether the new allocation resets, carries forward, or adjusts.

Bulk Migration

Support governed product migration when retiring legacy memberships.

Example:

Migrate 8,200 Legacy Gold members to Gold 2027 at next renewal.

Acceptance Condition

Memberships can move between tiers/products without losing historical, financial or entitlement integrity.

13.2.7 — Renewal Operations & Auto-Renewal Management

Purpose

Operationally manage memberships approaching expiry and execute the renewal policies configured in Board 1.

Renewal Pipeline**Segment members into:**

- Renewal Not Open
- Renewal Eligible
- Renewal Invitation Sent
- Renewal Started
- Payment Pending
- Renewed
- Auto-Renew Scheduled
- Auto-Renew Failed
- Grace Period
- Expired Without Renewal

Renewal Queue**Display:**

- Member
- Membership
- Tier

- Expiry
- Renewal Window
- Renewal Price
- Auto-Renew
- Payment Method Status
- Eligibility
- Renewal Status

Renewal Execution

Validate:

- Eligibility
- Current Status
- Outstanding Issues
- Pricing
- Payment Method
- Consent
- Membership Version

Auto-Renewal

Track:

Scheduled → Pre-Notification → Payment Attempt → Success/Failure → Membership Extension

Retry Management

Example:

Attempt 1 fails.

→ Retry after 2 days.

Attempt 2 fails.

→ Retry after 3 days.

Final failure:

→ Customer action required.

Grace Period

Membership may enter:

Renewal Grace

according to Board 1 configuration.

Renewal Continuity

Prevent accidental gaps where policy intends continuous membership.

Example:

Current expiry:

31 Dec 2026

Renewed period:

1 Jan–31 Dec 2027.

Acceptance Condition

Membership teams can monitor and execute manual and automatic renewals while maintaining continuous and correctly versioned membership contracts.

13.2.8 — Member Exceptions, Overrides & Service Recovery

Purpose

Provide controlled handling of member-specific situations that fall outside normal membership policy.

Exception Types

Support:

- Eligibility Override
- Activation Extension
- Expiry Extension
- Complimentary Renewal
- Complimentary Benefit
- Entitlement Adjustment
- Freeze Exception
- Suspension Override
- Replacement Credential
- Renewal Exception
- Dependent Exception

Example

Member experienced a venue closure for 14 days.

Authorized manager grants:

14-day membership extension

Exception Request

Capture:

- Member
- Membership
- Requested Action
- Standard Policy Result
- Requested Exception
- Reason
- Supporting Documentation
- Financial Impact
- Entitlement Impact
- Requestor

Approval

Configure approval based on:

- Exception Type
- Value
- Duration
- Membership Tier

- User Role

Service Recovery

Possible remedies:

- Extend Membership
- Guest Ticket
- Complimentary Visit
- Fee Waiver
- Benefit Credit
- Renewal Discount
- Alternative Entitlement

Pricing/value should use central commercial services where relevant.

Segregation of Duties

High-value exceptions can require:

Requestor ≠ Approver.

AI Assistance

AI may suggest:

“Member lost three days of access due to a verified venue closure. Current recovery policy permits a three-day extension.”

AI remains advisory.

Acceptance Condition

Out-of-policy membership actions are handled through controlled exception and approval workflows rather than unrestricted manual editing.

13.2.9 — Member Lifecycle History, Audit & Case Timeline

Purpose

Maintain a complete historical record of everything that has happened to the membership from purchase to final expiry.

Lifecycle Timeline

Example:

01 Jan Membership Purchased
03 Jan Member Assigned
03 Jan Identity Verified
03 Jan Membership Activated
15 Feb Guest Ticket Used
10 Jun Membership Frozen
10 Jul Reactivated
01 Nov Renewal Window Opened
15 Nov Renewed
01 Jan New Membership Period Started

Events

Track:

- Purchase
- Assignment

- Activation
- Visits
- Benefit Usage
- Dependent Changes
- Credential Changes
- Freeze
- Suspension
- Reactivation
- Upgrade
- Downgrade
- Renewal
- Exceptions
- Expiry
- Cancellation

Before/After Audit

For configuration-sensitive member changes capture:

Previous Value → New Value

Example:

Expiry:

31 Dec → 14 Jan

Reason:

Service Recovery.

Actor

Record:

- Customer
- Agent
- Manager
- System
- API
- Integration

Related Transactions

Link to:

- Order
- Payment
- Ticket
- Reservation
- Access Event
- Approval
- Case
- Credential

Case Notes

Authorized users can add operational case notes without changing immutable historical events.

Export

Provide governed membership history exports for:

- Customer Service
- Finance
- Audit
- Compliance
- Management

Acceptance Condition

The entire membership lifecycle can be reconstructed chronologically with responsible users, systems, rules and related transactions.

13.2.10 — Membership Analytics, Renewal Intelligence & AI Retention Center

Purpose

Turn membership operational data into actionable intelligence for retention, renewal, product optimization and member engagement.

Executive KPIs

Display:

- Active Members
- New Memberships
- Renewal Rate
- Churn Rate
- Auto-Renew Success
- Average Membership Tenure
- Average Visits per Member
- Revenue per Member
- Membership Utilization
- Benefit Utilization
- Upgrade Rate
- Freeze/Suspension Rate

Cohort Analysis

Analyze by:

- Membership Product
- Tier
- Purchase Month
- Venue
- Acquisition Channel
- Customer Segment
- Geography

- Renewal Cohort

Renewal Funnel

Visualize:

Eligible for Renewal

- Contacted
- Renewal Started
- Payment Attempted
- Renewed
- Failed
- Expired

Usage vs Renewal

Analyze relationship between:

- Visits
- Benefit Usage
- Guest Ticket Usage
- Reservation Behavior
- Complaints/Exceptions
- Renewal

AI Churn / Renewal Intelligence

AI/ML can identify members with elevated non-renewal probability.

Example:

Member Renewal Probability: 34%

Drivers:

- Visits down 58%
- No visits in 90 days
- Two unused guest benefits
- Previous renewal occurred late
- Membership expires in 21 days

Recommended Actions

Depending on governance, AI may recommend:

- Renewal Reminder
- Benefit Reminder
- Membership Education
- Upgrade Offer
- Retention Offer
- Service Follow-Up

Any actual commercial offer must use approved pricing/promotion rules.

Revenue Forecast

Forecast:

- Expected Renewals
- Expected Churn

- Renewal Revenue
- Upgrade Revenue
- Membership Base Growth

Natural-Language Analytics

Authorized managers could ask:

“Which Gold members expiring next month have low renewal probability but high historical spend?”

or:

“Why did Family Pass renewal fall this quarter?”

AI Governance

Predictions should expose:

- Confidence
- Key Drivers
- Model Version
- Data Freshness

and avoid automatically making irreversible member/account changes.

Acceptance Condition

Management can analyze membership performance and use governed AI intelligence to improve renewal, retention and membership-product performance.

Board 2 — Final Screen Register

#	Backend Screen	Core Responsibility
13.2.1	Member Operations Command Center	Member population operations
13.2.2	Member 360° Membership Account Workspace	Complete member/membership view
13.2.3	Membership Activation, Assignment & Credential Management	Activation and credentialing
13.2.4	Visit, Admission & Entitlement Usage Monitor	Usage and consumption
13.2.5	Membership Freeze, Suspension & Reactivation Management	Temporary lifecycle controls
13.2.6	Membership Upgrade, Downgrade & Product Migration Operations	Membership transitions
13.2.7	Renewal Operations & Auto-Renewal Management	Renewal execution

#	Backend Screen	Core Responsibility
13.2.8	Member Exceptions, Overrides & Service Recovery	Controlled exceptions
13.2.9	Member Lifecycle History, Audit & Case Timeline	Complete traceability
13.2.10	Membership Analytics, Renewal Intelligence & AI Retention Center	Analytics and AI

Area 13 is now structurally complete

With this Board 2, Area 13 = 2 Boards / 20 backend screens:

Board 1 — Configure the Membership Product

Board 2 — Operate the Member & Membership Lifecycle

There is also an important AI opportunity here. I would make **13.2.10 a serious ML/AI capability**, not simply an LLM dashboard. TICVAI can eventually build renewal/churn models from visits, booking frequency, membership age, benefit utilization, purchase behavior and other permitted signals. The LLM layer can then explain the prediction conversationally, while the underlying prediction comes from governed analytical/ML models.

This also keeps Area 13 from duplicating CRM and Loyalty: **CRM knows the customer; Loyalty knows points/rewards; Membership knows the contractual pass and its entitlements.**

Board 2 is ready to freeze at exactly 10 screens. The next action is the High-Definition Board 2 design with all 10 screens.
