### 10 Backend Screens

#### Board Objective

Board 1 manages the **complete pre-booking commercial journey for direct group sales.**

**It is designed for customers such as:**

- Schools and universities
- Corporate groups
- Government organizations
- Tour groups booking directly
- Sports clubs
- Associations
- Private groups
- VIP groups
- Birthday/event groups
- Conferences
- Large family/social groups

**The core workflow should be:**

**Enquiry → Customer → Requirements → Availability → Package → Quote → Negotiation → Approval → Booking Conversion → Group Booking 360°**

**The architectural distinction from Area 8 must remain clear:**

**Area 8:** A reseller/OTA/partner distributes TICVAI products to its customers.

**Area 9:** The venue/operator sells directly to a group, company or organization.

---

**Screen 9.1.1 — Group Sales Command Center****Purpose**

Provide the Group Sales team with a centralized commercial workspace showing the entire group-sales pipeline.

**Executive KPIs****Display:**

- New Enquiries
- Open Opportunities
- Quotations Outstanding
- Quotes Awaiting Approval
- Confirmed Groups
- Expected Guests
- Pipeline Value
- Confirmed Revenue
- Conversion Rate
- Average Group Value
- Expiring Quotes
- Sales Target Achievement

**Sales Pipeline****Visualize:**

**New Enquiry → Qualified → Availability Checked → Quote Preparing → Quote Sent → Negotiation → Approval → Confirmed → Lost**

**Opportunity Table****Each opportunity should display:**

- Enquiry ID
- Organization/Customer
- Group Type
- Event/Attraction
- Visit Date
- Guest Count
- Sales Owner
- Estimated Value
- Quote Status
- Probability

- Next Action
- Expected Close Date

### Sales Tasks

#### Show:

- Follow-ups due
- Quotes expiring
- Customer responses
- Approval requests
- Deposits pending

### AI Capability

AI should prioritize opportunities based on likelihood and value.

#### Example:

#### High Priority Opportunity

Green Valley School — 420 students — AED 63K estimated value — requested date has only 18% capacity remaining.

#### Acceptance Condition

The Group Sales team can manage its complete direct-sales pipeline and immediately identify opportunities requiring commercial action.

---

## Screen 9.1.2 — Group Enquiry & Opportunity Capture

### Purpose

Capture a new group-sales enquiry and convert it into a structured sales opportunity.

### Enquiry Sources

#### Support:

- Website
- Phone
- Email
- Walk-in
- Sales Team
- CRM
- Referral
- Campaign
- Existing Customer
- Manual Entry

### Enquiry Information

#### Capture:

- Enquiry ID
- Customer/Organization
- Contact
- Group Type
- Requested Venue

- Requested Event/Experience
- Preferred Date
- Alternative Date
- Preferred Time
- Estimated Guests
- Adults
- Children
- Students
- Staff/Teachers
- Special Requirements
- Budget
- Notes

### Opportunity Information

#### Configure:

- Sales Owner
- Sales Team
- Priority
- Expected Value
- Probability
- Expected Close Date
- Lead Source
- Campaign
- Next Action

### Duplicate Detection

TICVAI should identify possible duplicate enquiries.

#### Example:

Similar enquiry already exists for Green Valley School, 18 November, 400 guests.

### AI Capability

AI can summarize emails/enquiry notes into structured requirements.

#### Example:

School requests approximately 350 students plus 28 teachers for a weekday museum visit, preferably between 09:00–13:00, including lunch.

### Acceptance Condition

Every group-sales request can be captured as a structured, owned and trackable opportunity without requiring a booking to exist yet.

---

## Screen 9.1.3 — Group Customer & Organization Profile

### Purpose

Maintain the customer or organization buying directly from TICVAI.

### Organization Types

#### Support:

- School
- University
- Company
- Government
- Sports Club
- Association
- Tour Group
- Private Group
- Event Organizer
- Charity
- Other

## Organization Profile

### Capture:

- Organization Name
- Customer ID
- Organization Type
- Registration Details where applicable
- Country
- City
- Address
- Tax/VAT Information
- Preferred Language
- Billing Details
- Account Owner

## Contact Management

### Maintain:

- Primary Contact
- Booking Contact
- Finance Contact
- Event-Day Contact
- Decision Maker

## Customer History

### Show:

- Previous enquiries
- Previous quotations
- Confirmed bookings
- Total guests
- Revenue
- Cancellation history
- Outstanding balance
- Future bookings

**CRM Integration**

The master customer profile should consume TICVAI's central CRM/customer data rather than create an isolated Group Sales customer database.

**AI Capability****AI can summarize relationship history:**

Green Valley School has booked six visits during the previous 18 months with 94% quotation conversion and no overdue payments.

**Acceptance Condition**

Sales teams can see the complete relationship with a group customer while maintaining one governed customer record across TICVAI.

---

## Screen 9.1.4 — Group Requirements, Availability & Capacity Planner

**Purpose**

Determine whether TICVAI can accommodate the requested group before preparing a quotation.

**Requirement Builder****Configure:**

- Venue
- Event/Attraction
- Date
- Alternative Dates
- Arrival Time
- Departure Time
- Group Size
- Guest Categories
- Accessibility Requirements
- Seating Requirement
- Resources
- Guides
- Catering
- Transportation
- Add-ons

**Availability View****Display:**

- Event Capacity
- Available Capacity
- Existing Groups
- Public Sales
- Operational Holds
- Resource Availability

- Timeslot Availability

### Calendar View

Use a visual calendar to compare alternative dates.

#### Example:

**12 Nov — 78% occupied**

**13 Nov — 46% occupied — Recommended**

**14 Nov — 91% occupied**

### Capacity Reservation

Authorized sales users may create a temporary group-sales hold while preparing the proposal.

### Resource Dependencies

**Where required, check availability through Resource Management for:**

- Guides
- Rooms
- Equipment
- Vehicles
- Meeting spaces
- Catering capacity

### AI Capability

AI can recommend alternatives.

Requested 10:00 slot cannot comfortably accommodate 450 students. The 09:00 slot has sufficient admission and catering capacity and is projected to reduce operational congestion by 31%.

### Acceptance Condition

Sales teams can validate admission, schedule and required resource availability before making a commercial commitment to the customer.

---

## Screen 9.1.5 — Group Package & Experience Builder

### Purpose

Build a complete commercial package tailored to the group's requirements.

### Package Components

#### Allow combinations of:

- Admission Tickets
- Group Ticket
- Guided Tour
- Reserved Seating
- F&B
- Meal Voucher
- Merchandise
- Transportation
- Parking

- Workshop
- Education Program
- Meeting Room
- VIP Experience
- Add-ons
- Rental Resources

### Example Package

#### School Discovery Package

- 350 Student Admissions
- 28 Teacher Admissions
- 4 Guided Tours
- 378 Lunch Meals
- Educational Workshop
- 2 Complimentary Coordinator Tickets

### Pricing Summary

#### Show:

- Standard Price
- Group Rate
- Discount
- Complimentary Quantity
- Add-on Price
- Tax
- Fees
- Package Total
- Price Per Guest

### Package Templates

#### Commercial teams can create reusable templates such as:

- School Package
- Corporate Package
- Birthday Package
- VIP Group Package
- Conference Package

### Dependency Validation

TICVAI should validate required relationships.

#### Example:

Lunch Package requires confirmed F&B capacity for 378 guests.

### AI Capability

AI can recommend relevant additions based on similar bookings.

71% of school groups above 250 guests add the educational workshop. Estimated additional revenue: AED 8,400.

### Acceptance Condition

Sales teams can build a multi-product group package while consuming approved TICVAI products, pricing and resources rather than manually calculating the offer outside the platform.

---

## Screen 9.1.6 — Group Quotation Builder & Proposal Generation

### Purpose

Turn the configured group package into a professional customer quotation.

### Quotation Information

#### Capture:

- Quote Number
- Opportunity
- Customer
- Contact
- Quote Date
- Valid Until
- Visit Date
- Guest Count
- Currency
- Sales Owner

### Commercial Lines

#### For each line:

- Product/Service
- Description
- Quantity
- Standard Rate
- Group Rate
- Discount
- Tax
- Fee
- Total

### Quotation Summary

#### Display:

**Subtotal**

**Discount**

**Fees**

**Tax**

**Total**

**Deposit Required**

**Balance Due**

**Terms**

**Include:**

- Quote validity
- Deposit requirement
- Payment schedule
- Cancellation policy
- Amendment conditions
- Guest-count deadline
- Operational terms

**Proposal Output**

**Generate a branded proposal suitable for:**

- Email
- PDF
- Customer portal
- Secure digital link

**Digital Acceptance**

**Where configured, customer can:**

**Accept / Reject / Request Changes**

**AI Capability**

AI can assist with proposal language and highlight commercial inconsistencies.

**Acceptance Condition**

Sales teams can generate a controlled, branded and auditable group quotation directly from the approved package configuration.

---

## Screen 9.1.7 — Quote Revision, Negotiation & Version Management

**Purpose**

Manage the commercial negotiation process without losing historical versions.

**Versioning**

**Example:**

**Q-2026-00421 v1**

→ Customer requests lower price

**v2**

→ Guest count increases

**v3 — Accepted**

**Compare Versions**

**Display:**

| Element | v1  | v2  | v3  |
|---------|-----|-----|-----|
| Guests  | 350 | 350 | 400 |

| Element  | v1      | v2      | v3      |
|----------|---------|---------|---------|
| Discount | 10%     | 12%     | 12%     |
| Total    | AED 62K | AED 60K | AED 68K |

## Negotiation Log

### Capture:

- Customer Request
- Internal Response
- Price Change
- Quantity Change
- Package Change
- Terms Change
- Date
- User

## Quote Status

**Draft → Internal Review → Sent → Viewed → Negotiation → Revised → Accepted / Rejected / Expired**

## Margin Protection

### Show impact of proposed concessions:

Additional 5% discount reduces estimated contribution by AED 4,280.

## AI Capability

### AI can provide negotiation intelligence:

Similar school groups of 300–450 guests have historically closed at an average discount of 11.8%.

## Acceptance Condition

Every quotation revision and negotiation decision is retained with complete commercial history and impact visibility.

## Screen 9.1.8 — Group Discount, Exception & Approval Workflow

### Purpose

Govern non-standard group pricing and commercial exceptions before a quote is committed.

### Approval Triggers

#### Examples:

- Discount above threshold
- Complimentary tickets above threshold
- Margin below minimum
- Large booking value

- Extended payment terms
- Reduced deposit
- Capacity exception
- Cancellation exception
- Special package pricing

### Example

#### Sales Executive proposes:

**Standard Group Discount:** 10%

**Requested:** 18%

#### System displays:

Approval required — Commercial Director.

### Approval Matrix

#### Approval can depend on:

- Discount %
- Transaction value
- Margin
- Customer type
- Venue
- Event
- Sales user
- Risk

### Workflow

#### Example:

#### Sales Executive

→ **Sales Manager**

→ **Commercial Director**

→ **Finance**, if financial terms are affected.

### Approval Workspace

#### Approver sees:

- Customer
- Opportunity
- Quote
- Standard Price
- Proposed Price
- Discount
- Margin Impact
- Historical Customer Value
- Reason
- Capacity Impact

### AI Capability

#### AI can provide decision support:

Customer has generated AED 420K over 18 months with no cancellations. Requested discount is 3% above standard but remains above minimum contribution threshold.

### **Acceptance Condition**

No quotation containing a controlled commercial exception can be issued or accepted without the appropriate approval.

---

## **Screen 9.1.9 — Quote-to-Booking Conversion & Confirmation**

### **Purpose**

Convert an accepted quotation into a confirmed TICVAI group booking without re-entering the commercial configuration.

### **Conversion Flow**

#### **Accepted Quote**

- **Final Availability Check**
- **Final Price Validation**
- **Capacity Confirmation**
- **Booking Creation**
- **Deposit/Payment Requirement**
- **Confirmation**

#### **Pre-Conversion Validation**

#### **Check:**

- Quote remains valid
- Capacity remains available
- Resources remain available
- Price remains approved
- Approval remains valid
- Customer details complete
- Payment/deposit rule configured
- Guest count valid

#### **Booking Creation**

#### **Generate:**

- Group Booking ID
- TICVAI Order
- Customer
- Visit/Event
- Products
- Quantity
- Agreed Price
- Payment Schedule
- Operational Requirements
- Sales Owner

#### **Capacity**

Temporary quotation/availability holds should convert into confirmed booking capacity where applicable.

### **Failure Handling**

#### **If capacity changed:**

Quotation accepted, but requested 10:00 capacity is no longer sufficient. Alternative 09:30 and 11:00 slots are available.

The system should not silently overbook.

### **Confirmation**

#### **Generate/send:**

- Booking Confirmation
- Payment Instructions
- Deposit Request
- Customer Portal Link where applicable
- Next Steps

### **Acceptance Condition**

An approved and accepted quotation can become a confirmed group booking while preserving the exact commercial agreement and without duplicate data entry.

---

## **Screen 9.1.10 — Group Booking 360° & Handover Workspace**

### **Purpose**

Provide a consolidated view of the completed sales journey and hand the confirmed group cleanly from Sales to Operations.

### **360° Header**

#### **Display:**

#### **Group Booking**

#### **Customer**

#### **Visit Date**

#### **Guest Count**

#### **Value**

#### **Sales Owner**

#### **Operational Owner**

#### **Payment Status**

#### **Booking Status**

#### **Commercial Section**

#### **Show:**

- Original Enquiry
- Opportunity
- Final Quote
- Discount
- Approval
- Agreed Price

- Deposit
- Balance

### **Booking Section**

#### **Show:**

- Products
- Tickets
- Date/time
- Capacity
- Seating where applicable
- Package components

### **Customer Section**

#### **Show:**

- Organization
- Main Contact
- Finance Contact
- Event-Day Contact

### **Operational Requirements**

#### **Display:**

- Arrival
- Group Check-In
- Guides
- Catering
- Accessibility
- Transport
- Parking
- Special Instructions
- Resources

### **Handover Checklist**

#### **Example:**

- Booking confirmed ✓
- Capacity secured ✓
- Deposit requested ✓
- Operations notified ✓
- Catering notified ✓
- Group contact confirmed ✓
- Guest list pending
- Final payment pending

### **Internal Collaboration**

#### **Allow:**

- Notes
- Tasks

- Attachments
- Department assignments
- Internal mentions
- Handover acknowledgment

### AI Summary

#### AI should generate a concise operational briefing:

#### Green Valley School — 420 Guests — 13 November

Arrival 08:45. Admission at 09:00. Four guides required. Lunch scheduled for 12:15. Two wheelchair-accessible routes required. Deposit pending; guest list due seven days before arrival.

#### Acceptance Condition

Once a group sale is confirmed, Sales can hand over a complete and structured booking to Operations without relying on emails, spreadsheets or manual re-entry.

## Board 1 — Final Screen Register

| Screen | Backend Screen                                      | Primary Responsibility         |
|--------|-----------------------------------------------------|--------------------------------|
| 9.1.1  | Group Sales Command Center                          | Group sales pipeline           |
| 9.1.2  | Group Enquiry & Opportunity Capture                 | Enquiry/opportunity creation   |
| 9.1.3  | Group Customer & Organization Profile               | Direct group customer 360      |
| 9.1.4  | Group Requirements, Availability & Capacity Planner | Feasibility and capacity       |
| 9.1.5  | Group Package & Experience Builder                  | Multi-product package creation |
| 9.1.6  | Group Quotation Builder & Proposal Generation       | Customer proposal              |
| 9.1.7  | Quote Revision, Negotiation & Version Management    | Negotiation/version control    |
| 9.1.8  | Group Discount, Exception & Approval Workflow       | Commercial governance          |
| 9.1.9  | Quote-to-Booking Conversion & Confirmation          | Convert sale into booking      |
| 9.1.10 | Group Booking 360° & Handover Workspace             | Sales-to-operations handover   |

### Board 1 Flow

#### The 10 screens create one continuous sales workflow:

**Enquiry → Customer → Requirements → Capacity → Package → Quote → Negotiate → Approve → Convert → Handover**

**Boundary with Board 2**

We should stop Board 1 at **confirmed booking and operational handover**.

**Board 2 — Group Booking Operations, Payment, Fulfillment & AI** should then start from the confirmed booking and cover:

**Operational Planning → Guest/Participant Management → Payment & Deposit Tracking → Ticket/Seat Allocation → Group Check-In & Fulfillment → Amendments → Cancellation/Refund → Reconciliation → Group Sales Performance → AI Intelligence**

This keeps the architecture clean: **Board 1 sells the group; Board 2 delivers and services the group.**

## Group Sales &amp; Corporate Booking Management

# Board 2 — Group Booking Operations, Payment, Fulfillment & AI

## 10 Backend Screens

### Board Objective

Board 1 ended when the quotation was accepted and converted into a confirmed group booking.

Board 2 takes over **from confirmation until the group visit is completed and financially closed.**

**The operational journey is:**

**Booking Handover → Operational Planning → Guest Management → Payment → Ticket/Seat Allocation → Fulfillment → Group Arrival & Check-In → Amendments → Reconciliation → Performance & AI**

This board should work particularly well for **schools, corporate groups, government groups, VIP groups, clubs, associations, private groups and large organized visits.**

## Screen 9.2.1 — Group Booking Operations Command Center

### Purpose

Provide Operations with a real-time command center for all confirmed and upcoming group bookings.

### Operational KPIs

### Display:

- Upcoming Groups
- Groups Today
- Expected Guests Today
- Groups Awaiting Deposit
- Guest Lists Pending
- Tickets Pending
- Resources Pending
- Groups Ready
- Groups With Issues
- Outstanding Payments
- Check-Ins Today
- Completed Groups

### Upcoming Groups Table

#### Display:

- Group Booking ID
- Organization
- Group Type
- Venue/Event
- Visit Date
- Arrival Time
- Guests
- Booking Value
- Payment Status
- Guest List Status
- Ticket Status
- Resource Status
- Readiness %
- Operational Owner

### Readiness Status

#### Use:

**Not Started / Preparing / Attention Required / Ready / Arrived / In Progress / Completed**

#### Timeline

#### Allow Operations to view:

**Today / Tomorrow / This Week / Calendar**

### Operational Alerts

#### Examples:

**Green Valley School — 420 guests — tomorrow 09:00**

Final guest list has not been submitted.

**ABC Corporation — 180 guests — today 18:00**

20% balance remains unpaid.

### AI Capability

AI should rank upcoming groups by operational risk rather than merely date.

### **Acceptance Condition**

Operations can identify every upcoming group, its readiness and outstanding actions from one centralized workspace.

---

## **Screen 9.2.2 — Group Operational Planning & Task Workspace**

### **Purpose**

Convert the commercial booking into a detailed operational execution plan.

### **Operational Plan**

#### **Configure/reference:**

- Arrival Date
- Arrival Time
- Arrival Location
- Group Meeting Point
- Entry Gate
- Departure Time
- Group Size
- Group Leaders
- Contact Person
- Ticketing Method
- Seating
- Guides
- Catering
- Transportation
- Parking
- Accessibility
- Equipment
- Special Requirements

### **Department Tasks**

#### **Automatically generate tasks for:**

##### **Admissions**

- Prepare group entry

##### **Ticketing**

- Prepare credentials

##### **F&B**

- Confirm meal quantities

##### **Resource Management**

- Assign guides/resources

##### **Security**

- Group arrival awareness

**Finance**

- Confirm payment

**Task Record****Each task should contain:**

- Task
- Department
- Owner
- Due Date/Time
- Priority
- Dependency
- Status
- Notes

**Operational Timeline****Example:**

**T-7 days** — Guest list due

**T-3 days** — Final headcount

**T-1 day** — Tickets generated

**T-2 hours** — Entry team notified

**Arrival** — Group check-in

**AI Capability**

AI can generate a recommended operational checklist based on the booking configuration.

**Acceptance Condition**

Every confirmed group can be translated into a structured operational plan with owners, deadlines and dependencies.

---

**Screen 9.2.3 — Participants, Guest Lists & Group Structure****Purpose**

Manage the people participating in the group where individual information is required.

**Guest List Modes****Support:****Named Guests**

Individual guest information required.

**Quantity-Based**

Only quantities by category are required.

**Hybrid**

Some participants named while others remain quantity-based.

**Guest Information****Where required:**

- First Name
- Last Name
- Guest Type

- Age/Date of Birth where applicable
- Ticket Category
- Email
- Mobile
- Membership
- Accessibility Requirement
- Dietary Requirement
- Group/Subgroup
- Seat
- Credential Status

### **Import**

#### **Support:**

- Manual Entry
- CSV/Excel Import
- Customer Upload
- API
- Previous Group Template

### **Group Structure**

#### **Example:**

#### **Green Valley School — 420**

- Class 7A — 32
- Class 7B — 31
- Class 7C — 30
- Teachers — 28
- Coordinators — 4
- Remaining classes...

### **Validation**

#### **Detect:**

- Duplicate guest
- Missing required field
- Invalid category
- Guest count mismatch
- Age/ticket mismatch
- Duplicate ticket assignment

### **Privacy**

Guest information must follow TICVAI privacy, retention and access policies.

### **AI Capability**

AI can identify list inconsistencies and summarize special requirements.

### **Acceptance Condition**

TICVAI can maintain accurate participant information and reconcile the guest list against the confirmed group quantity.

## Screen 9.2.4 — Group Payment, Deposit & Balance Management

### Purpose

Track the complete payment lifecycle of a group booking.

### Payment Summary

#### Display:

- Booking Value
- Deposit Required
- Deposit Paid
- Balance
- Amount Paid
- Amount Outstanding
- Next Due Date
- Payment Status

### Example

**Booking Total:** AED 68,000

**Deposit 30%:** AED 20,400 — Paid

**Second Payment:** AED 20,400 — Paid

**Final Balance:** AED 27,200 — Due 7 days before visit

### Payment Schedule

#### Support:

- Deposit
- Milestone Payment
- Installment
- Final Balance
- Custom Schedule

### Payment Methods

#### Consume TICVAI Payment/Finance capabilities:

- Payment Link
- Card
- Bank Transfer
- Account Credit
- Cash where permitted
- Other approved method

### Status

**Not Due / Due / Partially Paid / Paid / Overdue / Waived / Refunded**

### Automated Actions

#### Based on rules:

- Send reminder
- Notify Sales

- Notify Finance
- Place booking on payment hold
- Prevent ticket release
- Escalate overdue balance

### AI Capability

AI can identify bookings at payment risk.

This customer historically pays 4-6 days late. Final payment is due in three days.

### Architecture

Payment processing and accounting remain owned by Payment/Finance.

This screen provides the **group-booking payment schedule and operational status**.

### Acceptance Condition

Sales, Finance and Operations can understand exactly what has been paid, what remains due and whether payment conditions permit fulfillment.

---

## Screen 9.2.5 — Group Ticket, Seat & Entitlement Allocation

### Purpose

Allocate the confirmed group inventory to individual guests, subgroups or quantity blocks.

### Allocation Modes

#### Support:

- Individual Ticket
- Bulk Ticket
- Group Credential
- Named Ticket
- Quantity-Based Ticket
- Reserved Seat
- General Admission
- Zone Allocation

### Allocation Workspace

#### Display:

- Product
- Quantity Booked
- Quantity Allocated
- Remaining
- Ticket Type
- Seat/Zone
- Guest/Subgroup
- Credential Status

### Reserved Seating

Where seating applies, integrate with the Seat Management module.

### Example:

**Group Requirement: 180 seats****Assigned:**

- Section A
- Rows 12-18
- 180 seats

**Group Seating Controls****Support:**

- Keep group together
- Split by subgroup
- Accessible seats
- Teacher/leader adjacent seating
- VIP allocation
- Companion seats

**Entitlements****Allocate associated:**

- Admission
- Meal
- Workshop
- Parking
- Fast Track
- Merchandise
- Other package components

**AI Capability**

For seated events, AI can recommend the best seat block while maintaining group adjacency and accessibility requirements.

**Acceptance Condition**

Every confirmed group entitlement can be correctly allocated without creating duplicate capacity or conflicting seat assignments.

---

**Screen 9.2.6 — Group Ticket Fulfillment & Distribution****Purpose**

Control how tickets and other credentials are delivered to the group.

**Fulfillment Options****Support:**

- One Group QR
- Individual QR
- Group Leader Wallet
- Individual Mobile Tickets
- Email
- Print at Home
- POS Print

- RFID
- NFC
- Wristband
- Physical Collection

### **Distribution Models**

#### **Central Distribution**

All tickets sent to the group coordinator.

#### **Individual Distribution**

Each participant receives their credential.

#### **Subgroup Distribution**

Tickets distributed to teachers/team leaders.

### **Fulfillment Dashboard**

#### **Display:**

- Tickets Required
- Generated
- Sent
- Delivered
- Opened
- Downloaded
- Failed
- Reissued

### **Actions**

#### **Authorized users can:**

- Generate Tickets
- Send
- Resend
- Print
- Reissue
- Change Delivery Method
- Revoke where permitted

### **Group Manifest**

#### **Generate an operational manifest showing:**

- Guest
- Ticket
- Seat
- Credential
- Entitlements
- Check-In Status

### **Important Architecture**

Ticket generation and credential security remain owned by the Ticket Media/Ticketing services.

## Acceptance Condition

TICVAI can securely distribute group credentials through different delivery models while maintaining complete ticket-to-guest traceability.

---

## Screen 9.2.7 — Group Arrival, Check-In & Admission Operations

### Purpose

Manage the physical arrival and admission of large groups efficiently.

### Arrival Dashboard

#### Display:

- Groups Expected Today
- Arrival Time
- Actual Arrival
- Group Size
- Checked In
- Remaining
- Gate
- Group Leader
- Readiness
- Issues

### Group Check-In Modes

#### Support:

#### Single Group Check-In

One credential confirms the entire group where business rules permit.

#### Batch Check-In

Example: admit 30 students at once.

#### Individual Check-In

Each credential scanned individually.

### Arrival Workflow

#### Group Arrives

- **Coordinator Identified**
- **Booking Verified**
- **Headcount Confirmed**
- **Credentials Validated**
- **Group Admitted**

### Headcount

#### Capture:

- Booked
- Expected
- Arrived

- No-Show
- Additional Guests
- Staff/Leaders

### Exceptions

#### Handle:

- Missing guest
- Extra guest
- Invalid ticket
- Wrong date
- Late arrival
- Payment hold
- Missing credential
- Accessibility requirement

### Integration

Consume Access Control for actual credential validation.

### AI Capability

AI can predict arrival congestion.

Three groups totaling 890 guests are scheduled to arrive at Gate 2 between 08:45–09:10. Recommend moving one group to Gate 3.

### Acceptance Condition

Operations can process large group arrivals efficiently while preserving accurate admission and headcount records.

---

## Screen 9.2.8 — Group Amendments, Cancellation & Refund Operations

### Purpose

Manage changes occurring after group confirmation.

### Amendment Types

#### Support:

- Increase Guest Count
- Reduce Guest Count
- Date Change
- Time Change
- Product Change
- Package Change
- Seat Change
- Catering Change
- Resource Change
- Full Cancellation
- Partial Cancellation

### Impact Assessment

**Before confirming an amendment, show:****Commercial Impact**

- Original Value
- New Value
- Additional Charge
- Refund/Credit
- Fees

**Capacity Impact**

- Tickets added/released
- Seats affected

**Resource Impact**

- Guides
- Catering
- Rooms
- Equipment

**Operational Impact**

- Tasks
- Tickets
- Guest lists

**Approval****Trigger approval for exceptions such as:**

- Late cancellation
- Waived fee
- Large refund
- Capacity override
- Contract exception

**Version History****Maintain:**

**Original Booking → Amendment 1 → Amendment 2 → Final Booking**

**AI Capability**

AI can summarize the total impact before approval.

**Acceptance Condition**

Post-confirmation changes update all affected commercial, capacity, resource, ticketing and operational records through one governed amendment process.

---

## Screen 9.2.9 — Group Booking Reconciliation, Closure & Performance

**Purpose**

Close the group booking after the visit and reconcile what was sold against what actually occurred.

**Booking Reconciliation**

**Compare:****Quoted**

VS.

**Booked**

VS.

**Paid**

VS.

**Allocated**

VS.

**Issued**

VS.

**Attended**

VS.

**Consumed****Example**

| Measure          | Quantity |
|------------------|----------|
| Booked           | 420      |
| Final Guest List | 414      |
| Tickets Issued   | 414      |
| Checked In       | 398      |
| No-Show          | 16       |

**Financial Reconciliation****Display:**

- Final Booking Value
- Amount Paid
- Refunds
- Additional Charges
- Outstanding Balance
- Final Revenue

**Package Reconciliation****Where applicable:**

- Meals booked vs redeemed
- Workshops booked vs attended
- Parking used
- Merchandise fulfilled
- Resources consumed

## Closure Checklist

### Require:

- Admission reconciled
- Finance reconciled
- Refunds resolved
- Resources closed
- Open cases resolved
- Customer feedback captured where applicable

### Status

**Operationally Complete → Financially Complete → Closed**

### Performance Metrics

#### Capture:

- Attendance %
- No-Show %
- Revenue per Guest
- Package Attachment
- Operational Issues
- Customer Satisfaction where available

### Acceptance Condition

A group booking cannot be considered fully closed until operational and financial activity has been reconciled.

---

## Screen 9.2.10 — Group Sales Analytics & AI Intelligence Center

### Purpose

Provide management with intelligence across the complete group-sales lifecycle.

This should combine data from **Board 1 + Board 2**.

### Executive KPIs

#### Analyze:

- Enquiries
- Quotes
- Conversion Rate
- Group Bookings
- Guests
- Revenue
- Average Group Size
- Average Booking Value
- Discount %
- Revenue per Guest
- Cancellation Rate

- No-Show Rate
- Outstanding Receivables
- Repeat Customer Rate

## Sales Funnel

### Visualize:

**Enquiries → Qualified → Quoted → Approved → Confirmed → Completed**

Show conversion at each stage.

## Analysis Dimensions

### Filter by:

- Customer Type
- Organization
- Venue
- Event
- Sales Owner
- Group Type
- Product
- Date
- Campaign
- Market

## AI Commercial Intelligence

### Examples:

#### Conversion Insight

School enquiries quoted within four business hours convert 23% better than those quoted after one day.

#### Pricing Insight

Corporate groups accepting packages with F&B generate AED 41 higher revenue per guest.

#### Capacity Insight

Tuesday morning school groups fill historically underutilized capacity without materially affecting B2C demand.

#### Operational Insight

Groups above 350 guests have significantly longer Gate 2 processing times.

## Forecasting

### AI can forecast:

- Group enquiries
- Expected confirmed groups
- Guest volume
- Revenue
- Capacity requirements
- Resource demand

## Natural-Language Copilot

### Management should be able to ask:

“Which school customers should we contact for November?”

“Which group packages generate the highest margin?”

“Why did group conversion decline this month?”

“Which weekdays have capacity we should target for school groups?”

“Which sales manager has the strongest quote-to-booking conversion?”

### **Opportunity Recommendations**

#### **AI can identify:**

##### **Upsell Opportunity**

Add lunch to corporate packages.

##### **Capacity Opportunity**

Target school groups on Tuesday mornings.

##### **Customer Opportunity**

14 schools booked last year but have not yet enquired for the upcoming term.

##### **Pricing Opportunity**

Group demand remains strong at the current discount level; additional discounting is unlikely to materially increase conversion.

### **Scenario Simulation**

#### **Example:**

**What if we offer 15% school discount on Tuesday mornings?**

#### **Estimate:**

- Additional groups
- Guests
- Revenue
- Capacity utilization
- Discount cost
- Expected contribution

### **Human Governance**

#### **AI recommendations should not automatically change:**

- Prices
- Discounts
- Capacity
- Refund policies
- Customer terms

without approved rules/workflows.

### **Acceptance Condition**

Management can analyze group-sales performance and use explainable AI recommendations to improve conversion, utilization, revenue and operational planning.

---

## Board 2 — Final Screen Register

| Screen | Backend Screen                                      | Primary Responsibility         |
|--------|-----------------------------------------------------|--------------------------------|
| 9.2.1  | Group Booking Operations Command Center             | Upcoming group readiness       |
| 9.2.2  | Group Operational Planning & Task Workspace         | Operational execution planning |
| 9.2.3  | Participants, Guest Lists & Group Structure         | Guest/participant management   |
| 9.2.4  | Group Payment, Deposit & Balance Management         | Payment schedule and status    |
| 9.2.5  | Group Ticket, Seat & Entitlement Allocation         | Ticket/seat allocation         |
| 9.2.6  | Group Ticket Fulfillment & Distribution             | Credential delivery            |
| 9.2.7  | Group Arrival, Check-In & Admission Operations      | Group arrival/admission        |
| 9.2.8  | Group Amendments, Cancellation & Refund Operations  | Post-confirmation changes      |
| 9.2.9  | Group Booking Reconciliation, Closure & Performance | Closure and reconciliation     |
| 9.2.10 | Group Sales Analytics & AI Intelligence Center      | Analytics, forecasting and AI  |

### Area 9 — Complete Architecture

With this board, **Area 9 contains 2 Boards / 20 backend screens.**

## Board 1 — Sell the Group

**Enquiry → Customer → Availability → Package → Quote → Negotiate → Approve → Convert → Handover**

## Board 2 — Deliver the Group

**Plan → Guests → Payment → Allocate → Fulfill → Check-In → Amend → Reconcile → Analyze**

One particularly important requirement I would keep in the final SOW is the **Group Booking 360° relationship**:

**One Group Booking ID must connect the original enquiry, customer, quotation versions, approvals, order, payment schedule, capacity, resources, guest lists, tickets, seats, fulfillment, access-control attendance, amendments and final reconciliation.**

That will prevent group bookings from becoming fragmented across CRM, Ticketing, Finance, Resource Management and Access Control.
