

TICVAI

POS & FRONTLINE OPERATIONS

Dashboard Screen Reference & Functional Scope

A structured reference for enterprise workstation, cash, shift, POS, offline and analytics operations.

36 DASHBOARD SCREENS **6** OPERATIONAL BOARDS

REFERENCE EDITION | AUGUST 2026

Prepared from the approved TICVAI dashboard screen set.

Table of Contents

Board 1 — Workstation & Device Management

- 1A Workstation Overview Dashboard
- 1B Workstation Registry
- 1C Workstation Details & Configuration
- 1D Hardware & Peripherals Management
- 1E Live Workstation Health Monitor
- 1F Software, Configuration & Version Management

Board 2 — Cash Management & Till Control

- 2A Cash Operations Dashboard
- 2B Till Configuration
- 2C Opening Float Management
- 2D Cash In / Cash Out Operations
- 2E Safe Drop & Cash Transfer Management
- 2F Cash Reconciliation & Variance Management

Board 3 — Shift & Operator Management

- 3A Shift & Operator Dashboard
- 3B Operator & Workstation Assignment
- 3C Shift Templates & Policies
- 3D Shift Opening & Login
- 3E Shift Exceptions & Alerts
- 3F Shift Closing & Settlements

Board 4 — POS Experience & Sales Configuration

- 4A POS Experience Dashboard
- 4B POS Profile Management
- 4C Layout & Journey Builder
- 4D Product & Category Button Configuration
- 4E Sales Rules, Discounts & Promotions
- 4F Deployment, Preview & Audit

Board 5 — Offline POS & Synchronization

- 5A Offline Operations Dashboard
- 5B Offline Policy & Rules Configuration
- 5C Offline Product & Data Cache Management
- 5D Connectivity & Auto-Switch Settings
- 5E Offline Transaction Monitor & Sync Queue
- 5F Offline Alerts, Limits & Audit

Board 6 — Enterprise Frontline Operations & Analytics

- 6A Enterprise Frontline Operations Dashboard
- 6B Venue Operations Dashboard
- 6C Department & Sub-Department Dashboard
- 6D Workstation Operations Dashboard
- 6E Transaction & Exception Monitoring
- 6F Frontline Analytics, AI Insights & Audit

Document Purpose and Scope

This document aligns the POS & Frontline Operations functional scope with the dashboard screens provided in the TICVAI Screens PDF. The former conceptual screen lists have been consolidated into the 36 implemented dashboard views shown in this revision. Each section explains the purpose, visible capabilities and operational value of the corresponding screen.

Screen Architecture

Board	Functional Area	Coverage
Board 1	Workstation & Device Management	Centralized administration and monitoring of POS workstations, devices, peripherals, software and operational health.
Board 2	Cash Management & Till Control	Controls opening float, cash movement, till balances, safe drops, transfers, counting, variance and reconciliation.
Board 3	Shift & Operator Management	Manages the actual POS operating shift from assignment and login through exceptions, closing and settlement.
Board 4	POS Experience & Sales Configuration	Controls the cashier-facing POS experience, layouts, products, commercial rules and deployment governance.
Board 5	Offline POS & Synchronization	Maintains controlled POS continuity during connectivity loss and governs cache, switching, synchronization and risk limits.
Board 6	Enterprise Frontline Operations & Analytics	Provides consolidated operational oversight from enterprise to venue, department, workstation and transaction level.

Architecture principle: Company → Venue → Department → Workstation → Operator/Shift → Transaction → Exception → Reconciliation → Analytics.

BOARD 1

Workstation & Device Management

Centralized administration and monitoring of POS workstations, devices, peripherals, software and operational health.

Board outcomes

Maintain a controlled workstation estate; monitor availability and health; manage peripherals, software and deployment history.

Included screens

- 1A | Workstation Overview Dashboard
- 1B | Workstation Registry
- 1C | Workstation Details & Configuration
- 1D | Hardware & Peripherals Management
- 1E | Live Workstation Health Monitor
- 1F | Software, Configuration & Version Management

Workstation Overview Dashboard

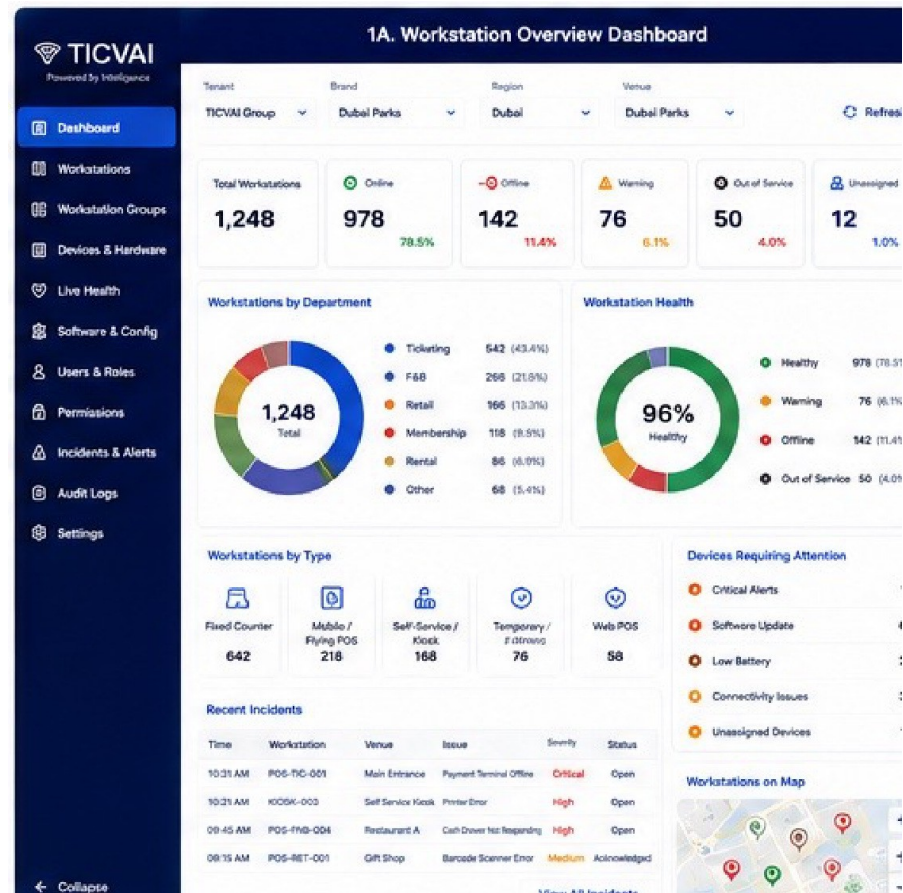

Figure 1 | Workstation Overview Dashboard

PURPOSE	Provides an enterprise-wide view of workstation availability, health and deployment status.
MAIN FUNCTIONS	Total workstations; online/offline/alert status; health and connectivity indicators; distribution by type; software status; recent incidents; geographic deployment.
OPERATIONAL VALUE	Operations and IT teams can identify service risks quickly, prioritize incidents and drill down from enterprise level to a specific workstation.

Workstation Registry

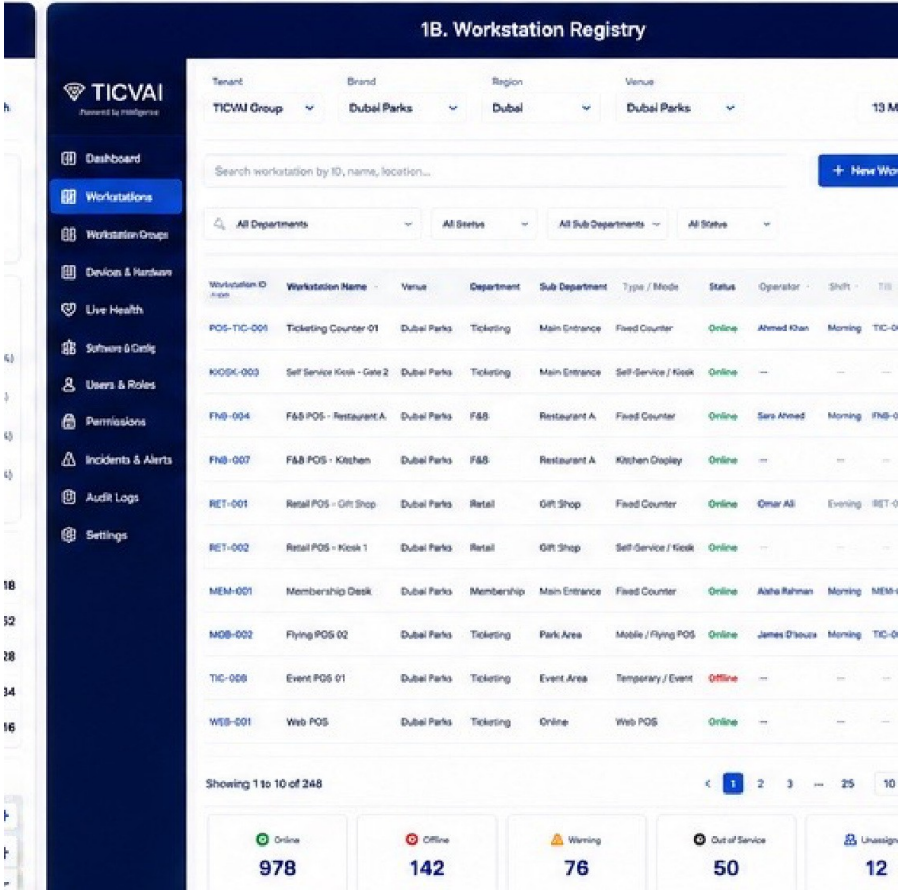

Figure 2 | Workstation Registry

PURPOSE

Maintains the controlled master list of all POS workstations across venues and departments.

MAIN FUNCTIONS

Search and filters; workstation ID and name; venue and department; workstation type; operating status; health; connectivity; software version; last activity; create workstation action.

OPERATIONAL VALUE

Creates a single source of truth for inventory, ownership, assignment and lifecycle management.

Workstation Details & Configuration

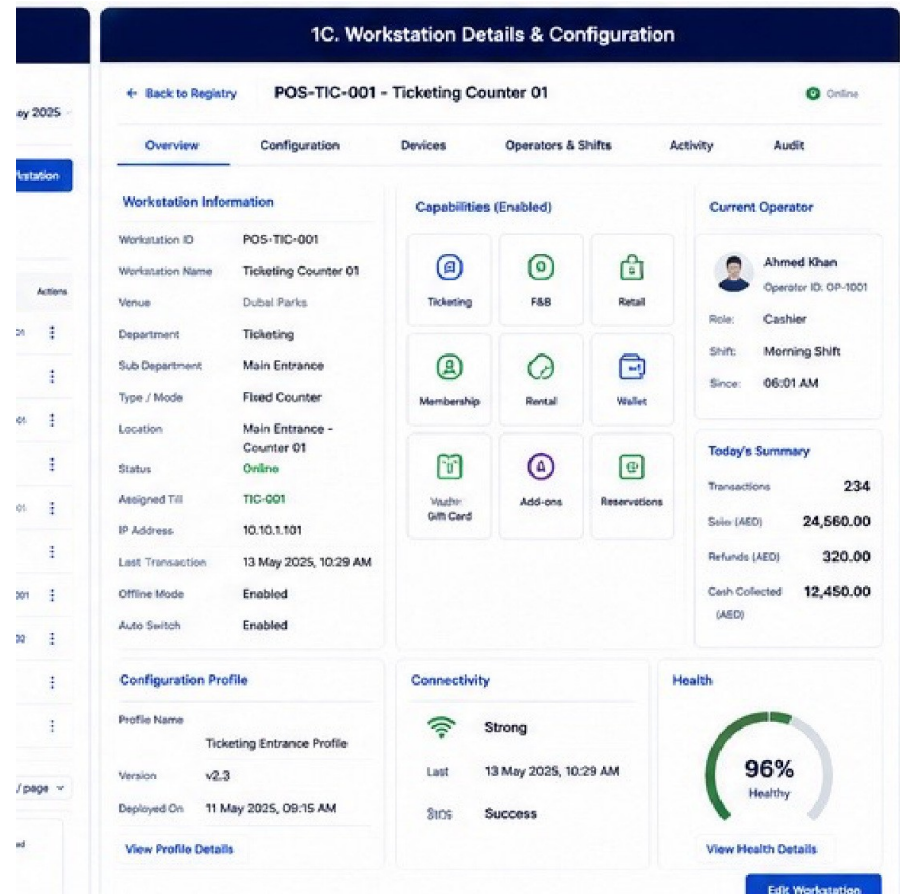

Figure 3 | Workstation Details & Configuration

PURPOSE	Displays the complete configuration and current operating profile of a selected workstation.
MAIN FUNCTIONS	Identity and assignment; operational status; workstation type; enabled capabilities; computer details; software profile; peripherals; connectivity; health score; activity and audit tabs.
OPERATIONAL VALUE	Supports controlled troubleshooting and configuration without losing the relationship between the device, venue, operator and sales channel.

Hardware & Peripherals Management

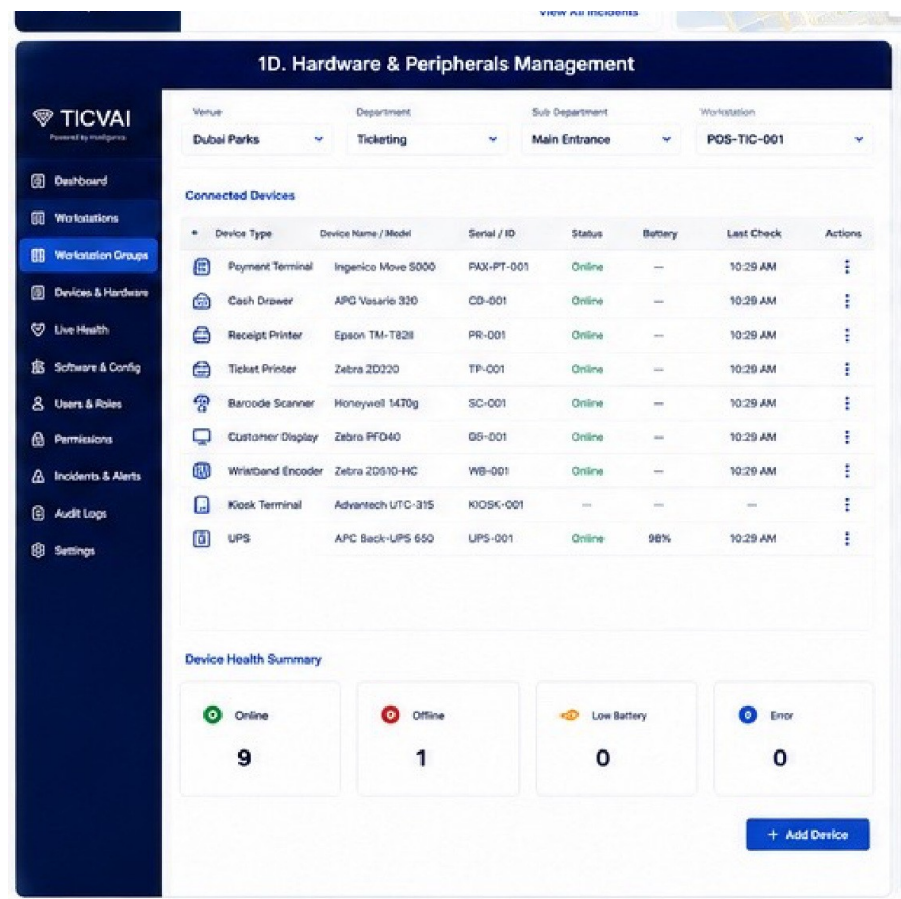

Figure 4 | Hardware & Peripherals Management

PURPOSE	Manages connected hardware and peripheral devices used by a workstation.
MAIN FUNCTIONS	Device type and model; serial and port; status; last check; add device; device health summary; printer, payment terminal, scanner, customer display and cash drawer records.
OPERATIONAL VALUE	Ensures required peripherals are correctly assigned, visible and supportable before frontline operations begin.

Live Workstation Health Monitor

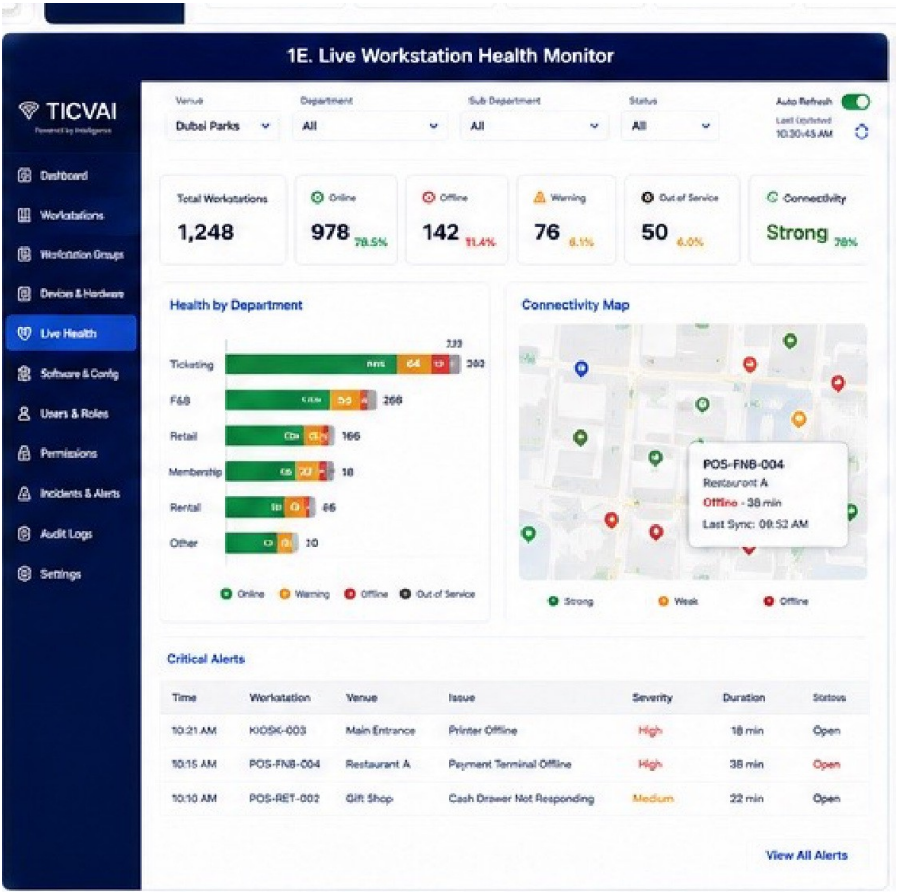

Figure 5 | Live Workstation Health Monitor

PURPOSE

Shows real-time technical health, connectivity and incidents across the workstation estate.

MAIN FUNCTIONS

Availability KPIs; health by department; connectivity map; live status; alerts and incidents; last heartbeat; response and recovery status.

OPERATIONAL VALUE

Enables proactive monitoring so degraded devices can be addressed before they interrupt sales or guest service.

Software, Configuration & Version Management

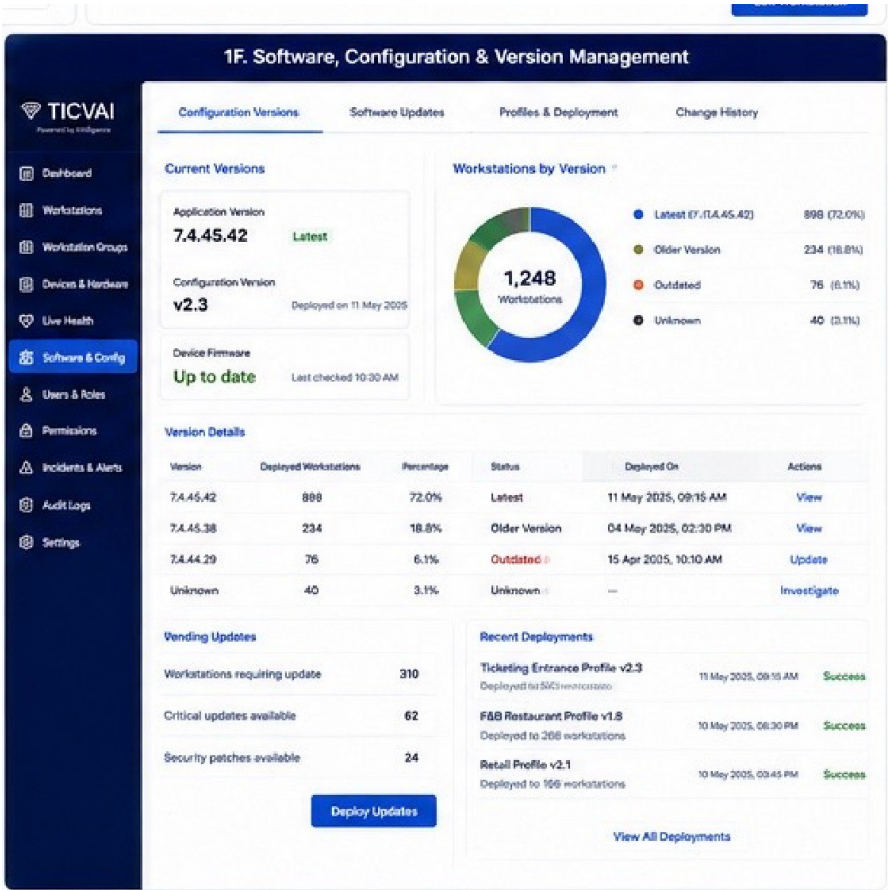

Figure 6 | Software, Configuration & Version Management

PURPOSE

Controls the software and configuration baseline deployed to POS workstations.

MAIN FUNCTIONS

Current and latest versions; compliance ring; workstation inventory; target configuration; rollout status; pending updates; deploy update; rollback and deployment history.

OPERATIONAL VALUE

Reduces version drift and provides an auditable method for controlled upgrades across venues.

BOARD 2

Cash Management & Till Control

Controls opening float, cash movement, till balances, safe drops, transfers, counting, variance and reconciliation.

Board outcomes

Establish accountability for every cash movement; enforce limits and approvals; reconcile expected and counted cash.

Included screens

- 2A | Cash Operations Dashboard
- 2B | Till Configuration
- 2C | Opening Float Management
- 2D | Cash In / Cash Out Operations
- 2E | Safe Drop & Cash Transfer Management
- 2F | Cash Reconciliation & Variance Management

Cash Operations Dashboard

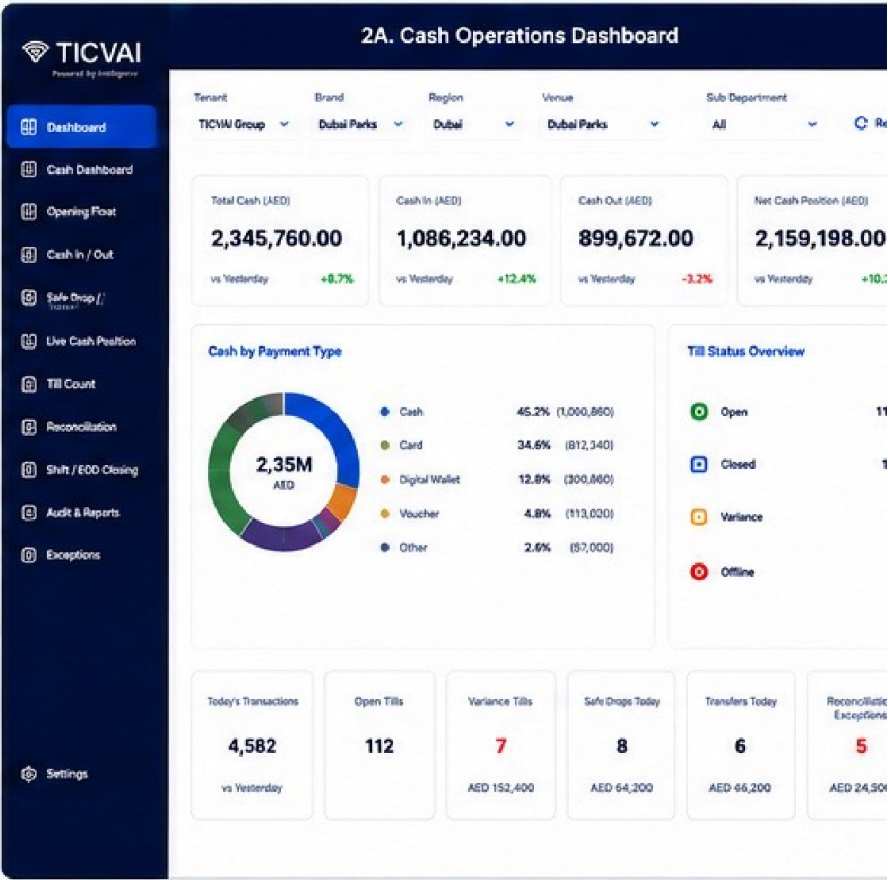

Figure 7 | Cash Operations Dashboard

PURPOSE

Summarizes cash exposure and reconciliation status across venues, tills and shifts.

MAIN FUNCTIONS

Cash sales; expected and actual cash; variance; open tills; pending reconciliation; payment composition; till status overview; exception counters; filters by venue, department, terminal and date.

OPERATIONAL VALUE

Gives Finance and operational supervisors one consolidated view of cash performance and unresolved risk.

Till Configuration

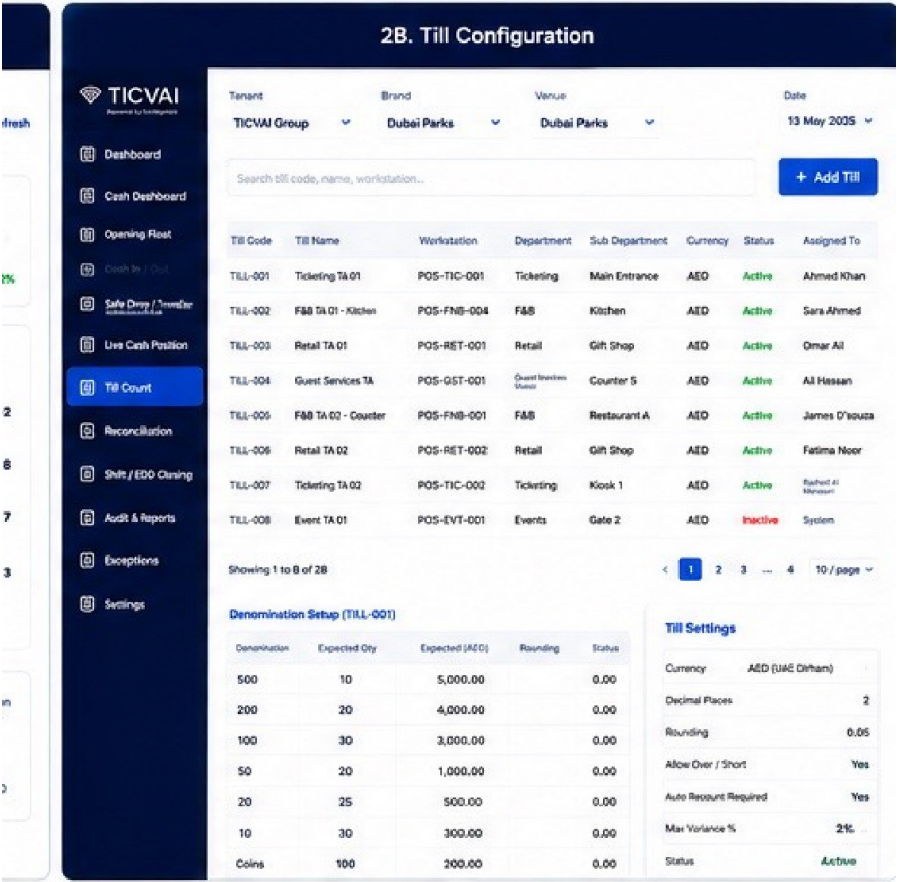

Figure 8 | Till Configuration

PURPOSE

Configures tills and their operational relationship to workstations, currencies and cashiers.

MAIN FUNCTIONS

Till ID and name; workstation; venue and department; type; accepted currency; assignment; status; cash limits; safe-drop threshold; drawer rules; add till action.

OPERATIONAL VALUE

Standardizes till setup and ensures cash activity is performed only through authorized and correctly configured tills.

Confirm Opening Float

Figure 9 | Opening Float Management

PURPOSE

Records and confirms the cash issued to a cashier before the shift opens.

MAIN FUNCTIONS

Opening float summary; expected and counted values; balance status; denomination quantities; counted totals; till details; cashier and shift; notes; confirmation and opening action.

OPERATIONAL VALUE

Establishes a verified starting cash position and supports dual confirmation where required.

Confirm Safe Drop

Figure 11 | Safe Drop & Cash Transfer Management

PURPOSE

Manages secure removal or transfer of cash when a till reaches its configured threshold.

MAIN FUNCTIONS

Safe drop or transfer selection; source and destination; amount; denominations; bag or seal reference; cashier; supervisor; safe or vault; transfer summary; confirmation.

OPERATIONAL VALUE

Reduces cash exposure and creates a two-party, traceable chain of custody.

Save & Approve

Figure 12 | Cash Reconciliation & Variance Management

PURPOSE

Compares expected cash with the physical count and manages the approval of differences.

MAIN FUNCTIONS

Expected and counted cash; variance; denomination count; reconciliation record; tolerance status; reason and notes; supporting evidence; approval or rejection controls.

OPERATIONAL VALUE

Provides formal settlement, configurable tolerance handling and a complete audit record for shortages or overages.

BOARD 3

Shift & Operator Management

Manages the actual POS operating shift from assignment and login through exceptions, closing and settlement.

Board outcomes

Connect the scheduled operator to the actual workstation shift; manage opening, exceptions, settlement and closure.

Included screens

- 3A | Shift & Operator Dashboard
- 3B | Operator & Workstation Assignment
- 3C | Shift Templates & Policies
- 3D | Shift Opening & Login
- 3E | Shift Exceptions & Alerts
- 3F | Shift Closing & Settlements

Shift & Operator Dashboard

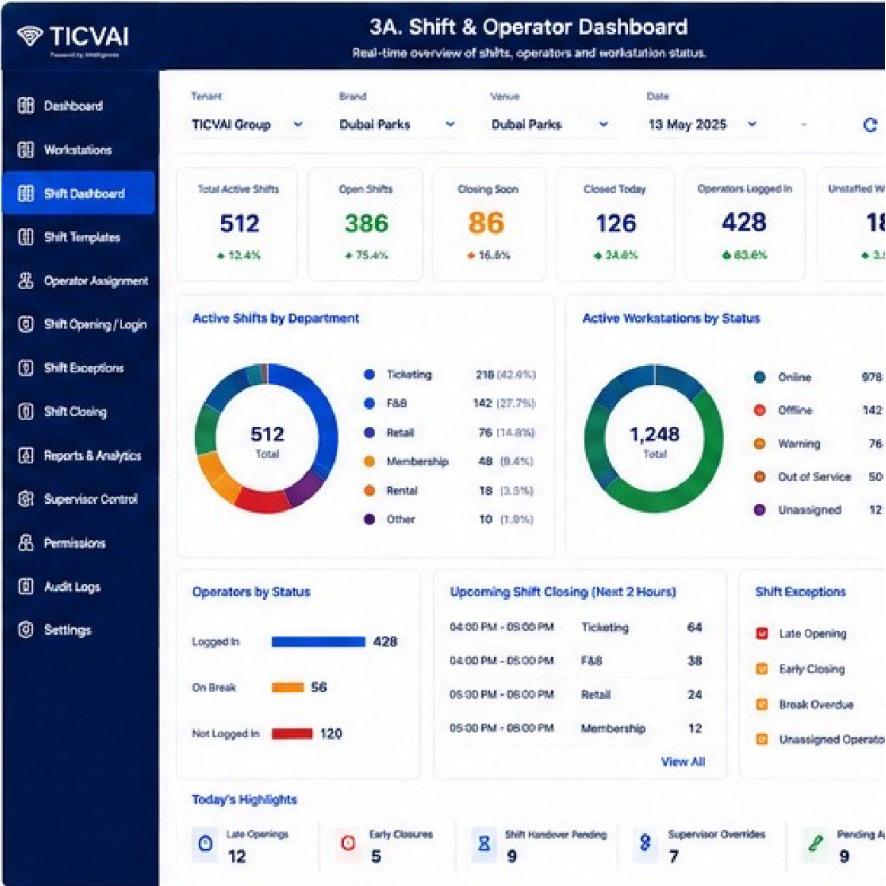

Figure 13 | Shift & Operator Dashboard

PURPOSE

Shows the live operational status of cashier shifts and workstation coverage.

MAIN FUNCTIONS

Active, scheduled, late, closing and closed shifts; logged-in operators; workstation allocation; active shifts by department and type; upcoming closures; exceptions; filters.

OPERATIONAL VALUE

Allows supervisors to see staffing gaps, overdue shifts and frontline exceptions in real time.

Operator & Workstation Assignment

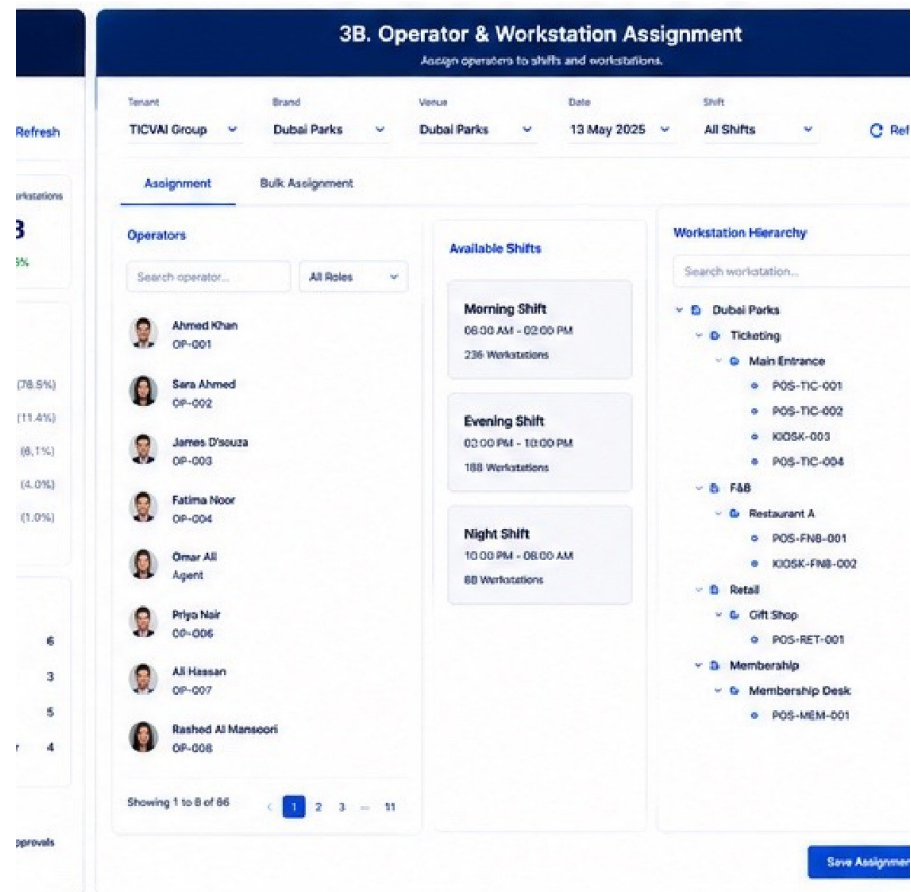

Figure 14 | Operator & Workstation Assignment

PURPOSE	Assigns authorized employees to shifts, workstations, tills and operating locations.
MAIN FUNCTIONS	Operator list; availability and role; shift options; venue and department hierarchy; workstation selection; assignment status; bulk assignment; validation and save.
OPERATIONAL VALUE	Prevents conflicts and ensures that only eligible employees operate permitted workstations.

Shift Templates & Policies

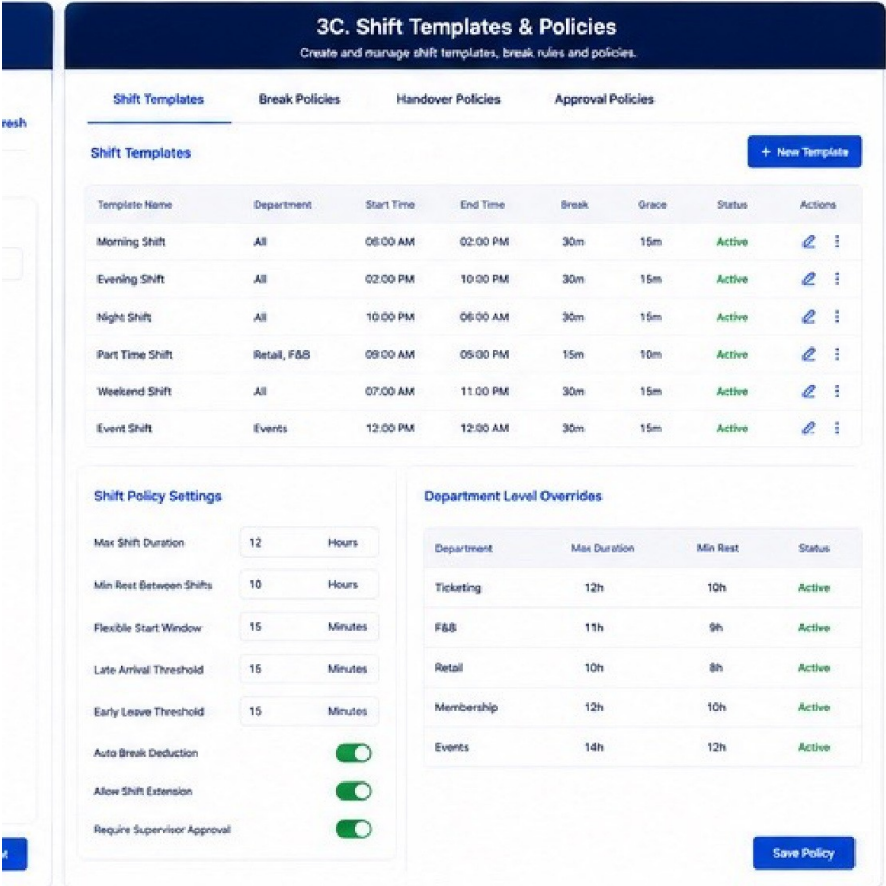

Figure 15 | Shift Templates & Policies

PURPOSE

Defines reusable shift templates and the rules that govern frontline operations.

MAIN FUNCTIONS

Template name and code; department; start and end times; break policy; grace period; days and effective dates; opening, closing, till, float, checklist and approval requirements.

OPERATIONAL VALUE

Promotes consistent shift control while allowing venue-specific operating policies.

Shift Opening & Login

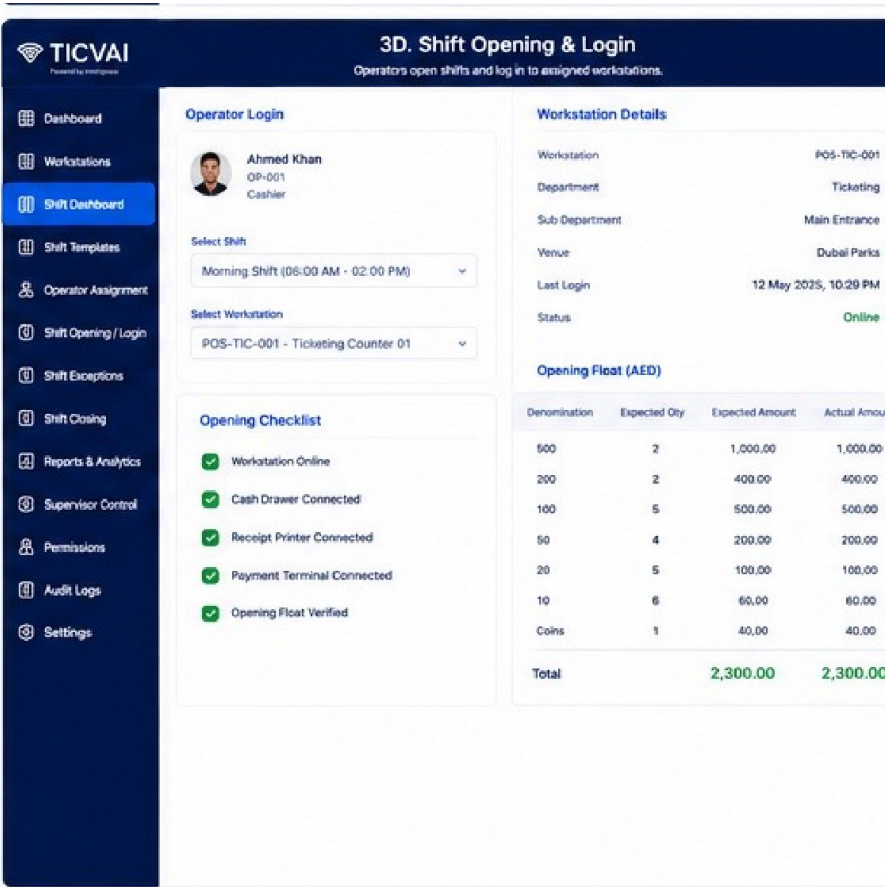

Figure 16 | Shift Opening & Login

PURPOSE

Guides an operator through secure login, workstation validation and shift opening.

MAIN FUNCTIONS

Operator identity; workstation, till and shift; authentication; opening checklist; denomination count; expected and counted float; equipment checks; open shift action.

OPERATIONAL VALUE

Ensures operational and cash prerequisites are verified before transactions are accepted.

Shift Exceptions & Alerts

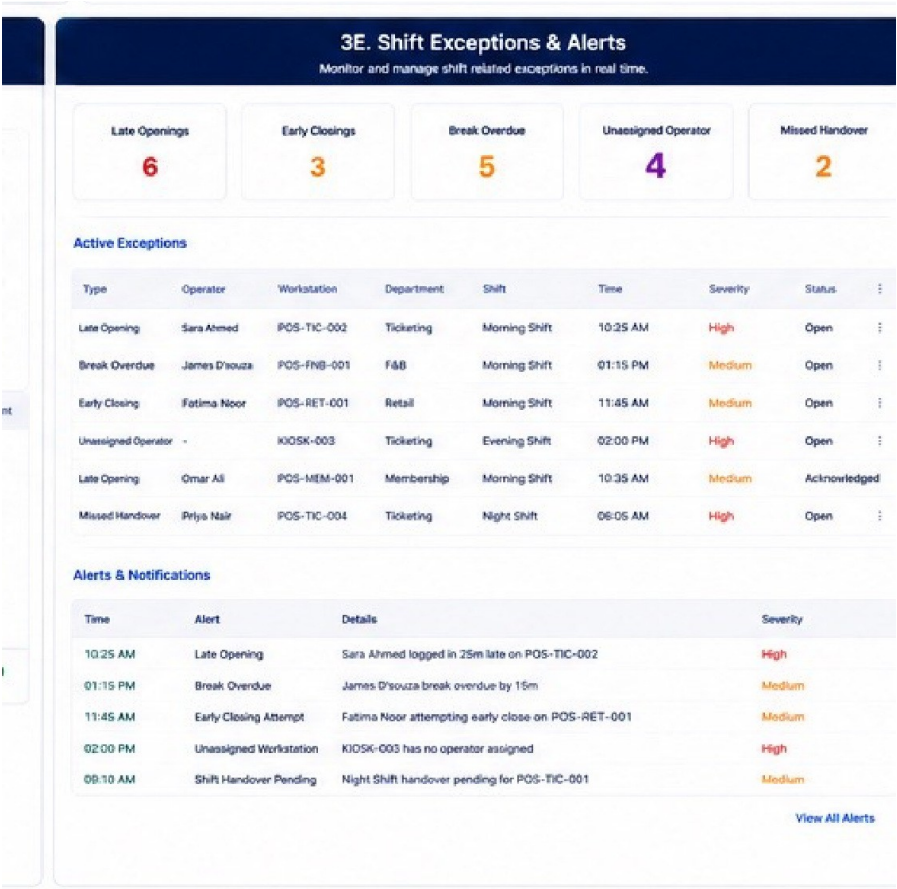

Figure 17 | Shift Exceptions & Alerts

PURPOSE

Centralizes active shift exceptions and the supervisor actions needed to resolve them.

MAIN FUNCTIONS

Late opening; early closing; overtime; break violations; missing assignment; cash variance; offline activity; unauthorized login; severity; owner; status; alerts and notifications.

OPERATIONAL VALUE

Provides a controlled response workflow with reason, approval and audit requirements for high-risk actions.

Shift Closing & Settlements

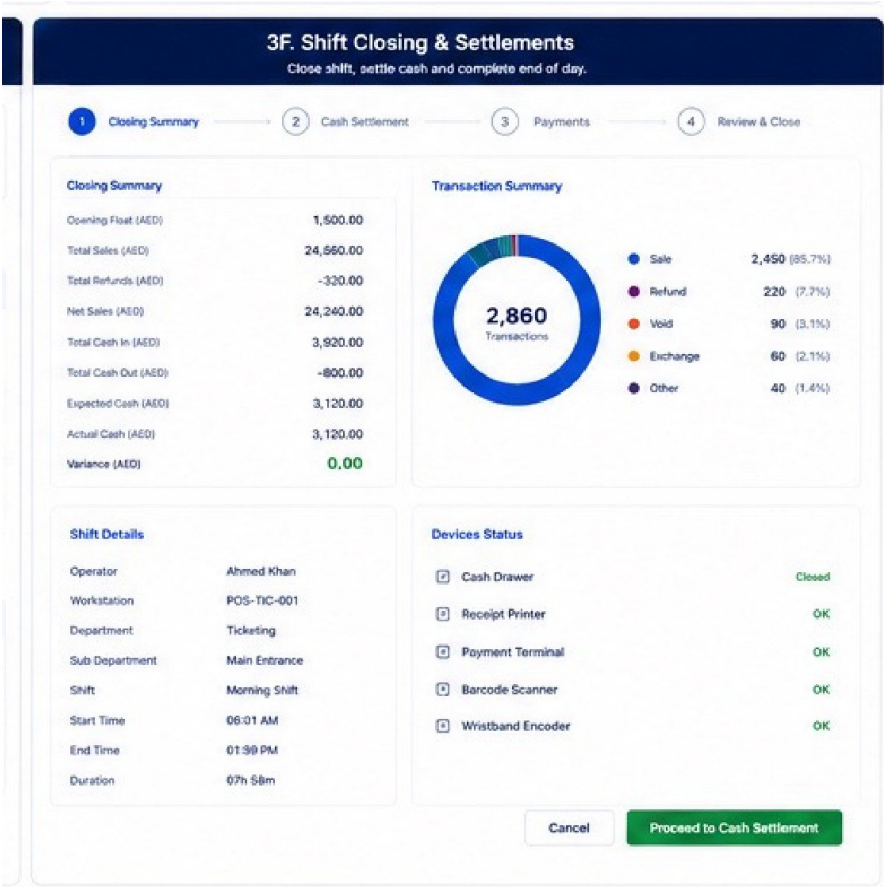

Figure 18 | Shift Closing & Settlements

PURPOSE

Formally closes a shift after transactions, payments, cash and exceptions are settled.

MAIN FUNCTIONS

Closing summary; transaction and payment totals; cash denomination count; expected and counted cash; variance; shift details; checklist; exceptions; supervisor approval; proceed to close.

OPERATIONAL VALUE

Prevents unresolved activity from being inherited by the next operator and completes the shift audit trail.

BOARD 4

POS Experience & Sales Configuration

Controls the cashier-facing POS experience, layouts, products, commercial rules and deployment governance.

Board outcomes

Create reusable POS profiles and layouts; govern products and commercial rules; deploy validated configurations safely.

Included screens

- 4A | POS Experience Dashboard
- 4B | POS Profile Management
- 4C | Layout & Journey Builder
- 4D | Product & Category Button Configuration
- 4E | Sales Rules, Discounts & Promotions
- 4F | Deployment, Preview & Audit

POS Experience Dashboard

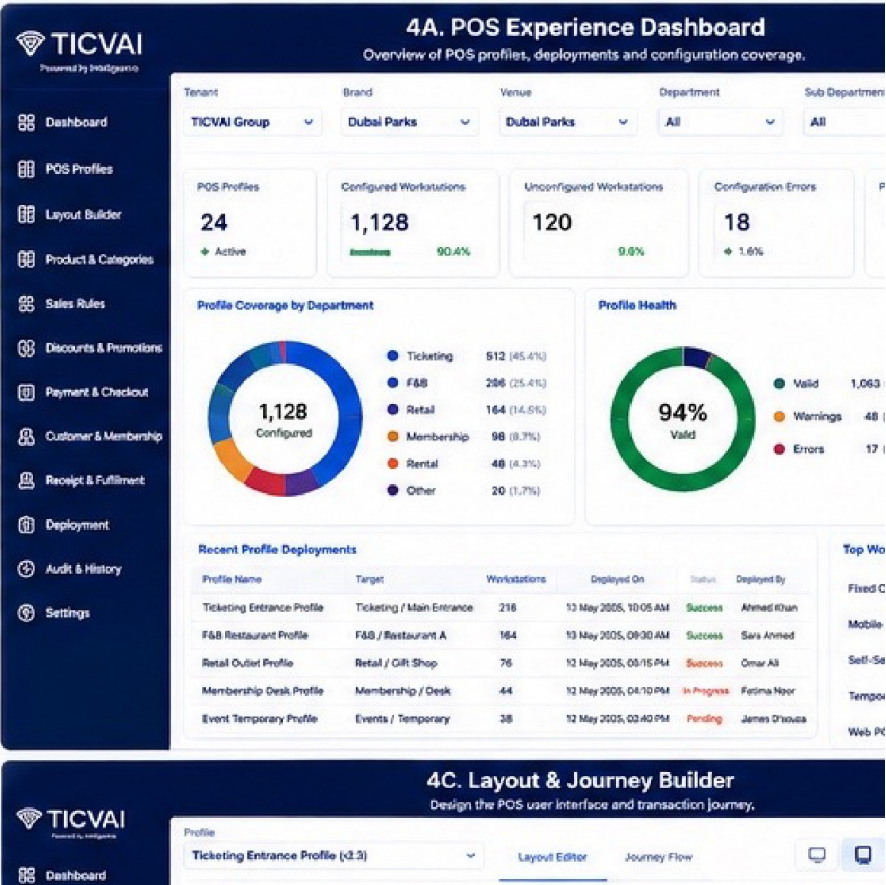

Figure 19 | POS Experience Dashboard

PURPOSE

Summarizes POS profiles, deployments, health and configuration activity.

MAIN FUNCTIONS

Profiles; active workstations; layouts; pending deployments; version status; profile coverage; recent profile changes; top workstation use; deployment alerts and audit activity.

OPERATIONAL VALUE

Provides administrators with a clear view of configuration readiness and rollout status.

POS Profile Management

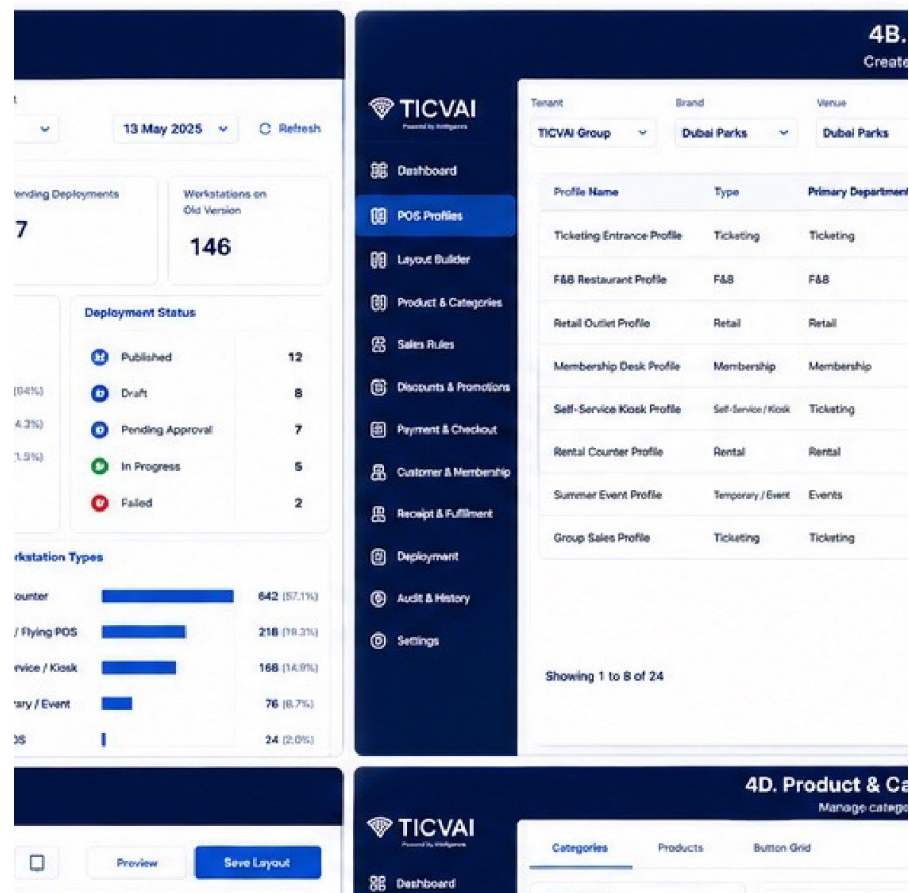

Figure 20 | POS Profile Management

PURPOSE	Creates and maintains reusable POS profiles for different venues, departments and sales use cases.
MAIN FUNCTIONS	Profile name and type; assigned department; status; version; workstation count; last update; selected profile details; configuration score; edit and new profile actions.
OPERATIONAL VALUE	Allows consistent configuration to be reused while supporting controlled venue or channel variations.

Layout & Journey Builder

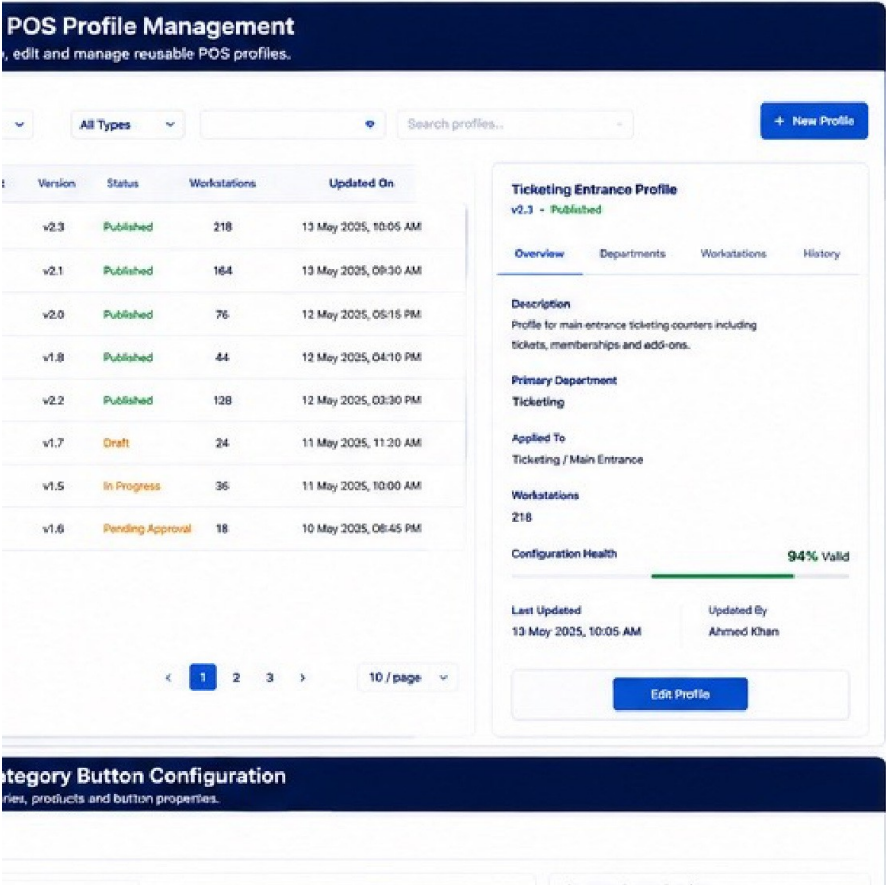

Figure 21 | Layout & Journey Builder

PURPOSE

Visually configures the cashier journey and the arrangement of categories, products and actions.

MAIN FUNCTIONS

Drag-and-drop components; category and product tiles; cart and action zones; properties panel; preview modes; validation; save layout; responsive workstation view.

OPERATIONAL VALUE

Aligns the selling interface with operational workflows and reduces cashier navigation time.

Product & Category Button Configuration

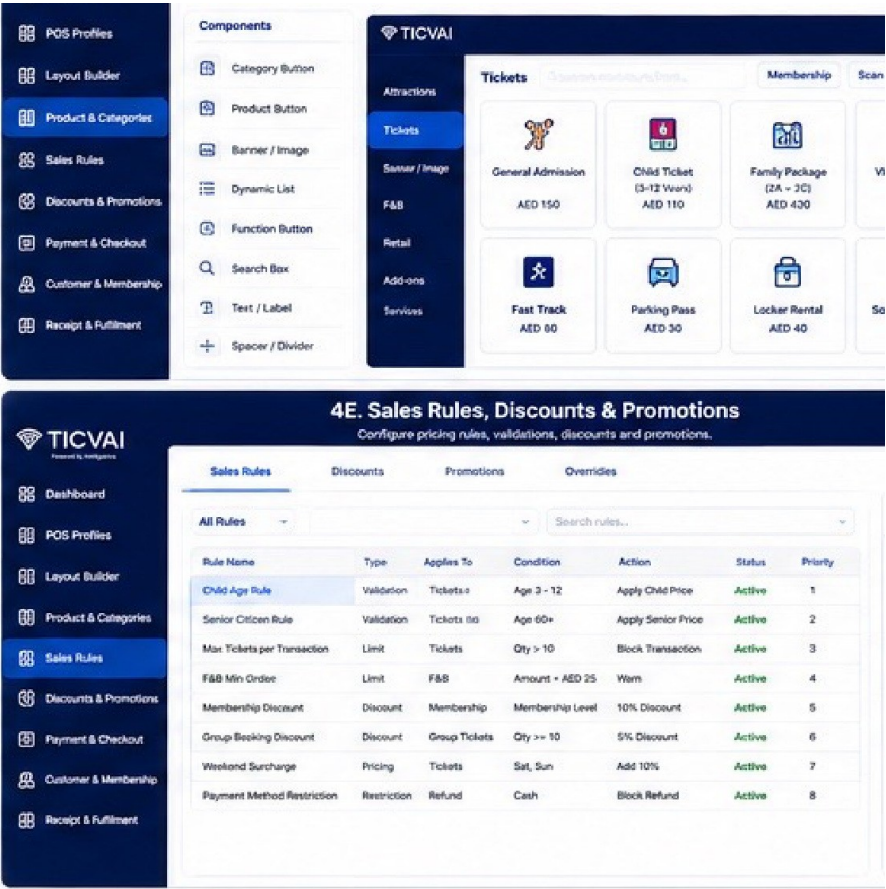

Figure 22 | Product & Category Button Configuration

PURPOSE

Controls which categories and products appear as POS buttons and how they are presented.

MAIN FUNCTIONS

Category tree; product mapping; button label, icon, color and order; active status; price display; visibility rules; search; preview; save changes.

OPERATIONAL VALUE

Keeps the sales catalogue clear, current and appropriate for each POS profile.

Sales Rules, Discounts & Promotions

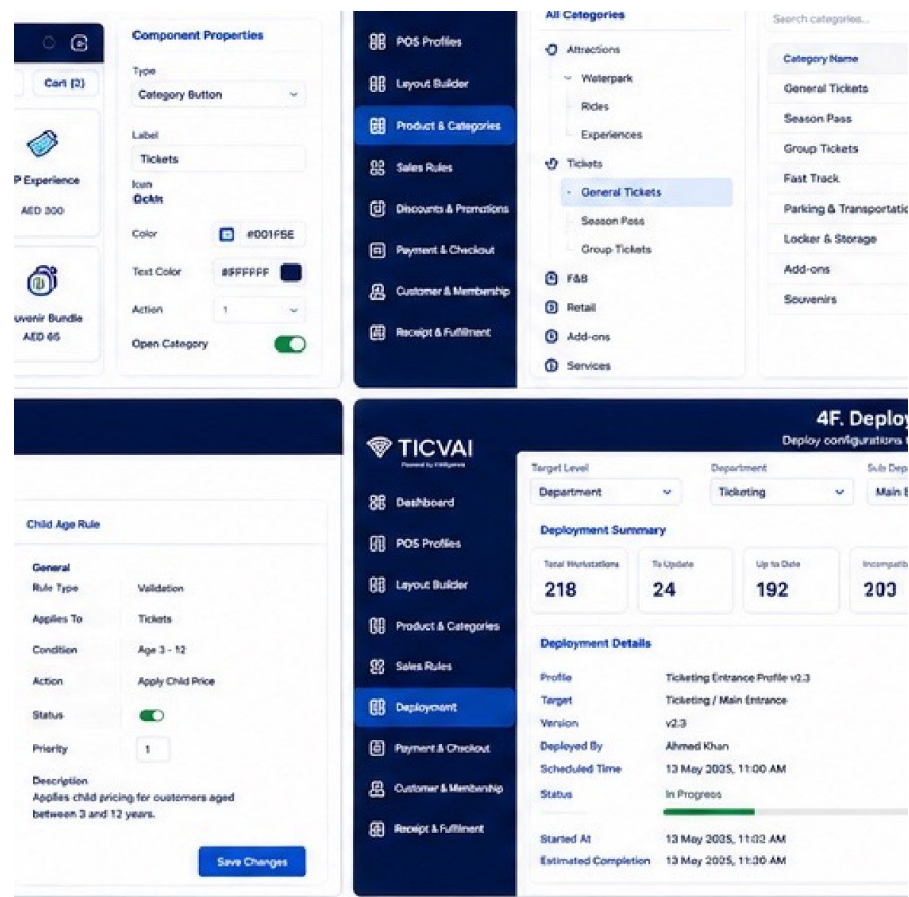

Figure 23 | Sales Rules, Discounts & Promotions

PURPOSE	Configures transaction controls and approved commercial rules.
MAIN FUNCTIONS	Sales rules; discounts; promotions; validity; eligible products or categories; customer or membership conditions; limits; stacking; approval level; reason codes; active status.
OPERATIONAL VALUE	Ensures pricing and discount behavior is consistent, authorized and auditable.

Deployment, Preview & Audit

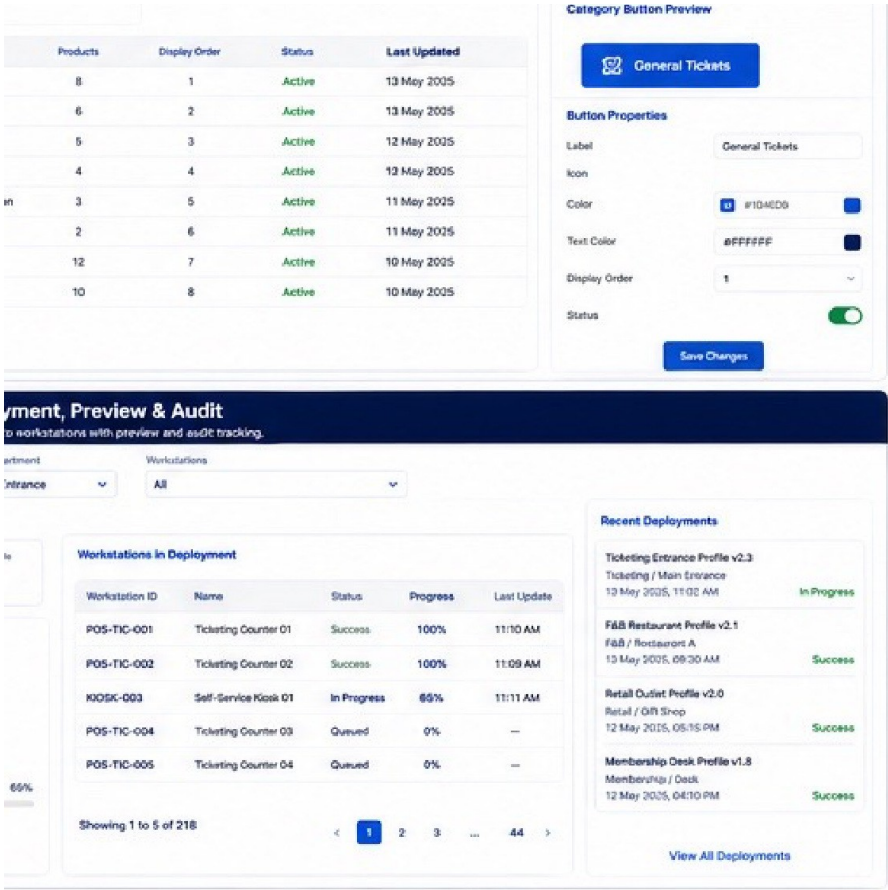

Figure 24 | Deployment, Preview & Audit

PURPOSE

Previews configuration changes, validates them and deploys approved versions to target workstations.

MAIN FUNCTIONS

Deployment summary; version comparison; readiness and validation results; target workstations; scheduled deployment; status; recent deployments; rollback; audit history.

OPERATIONAL VALUE

Separates configuration design from release control and reduces the risk of production disruption.

BOARD 5

Offline POS & Synchronization

Maintains controlled POS continuity during connectivity loss and governs cache, switching, synchronization and risk limits.

Board outcomes

Continue approved operations through connectivity loss; synchronize reliably; control offline financial and operational risk.

Included screens

- 5A | Offline Operations Dashboard
- 5B | Offline Policy & Rules Configuration
- 5C | Offline Product & Data Cache Management
- 5D | Connectivity & Auto-Switch Settings
- 5E | Offline Transaction Monitor & Sync Queue
- 5F | Offline Alerts, Limits & Audit

Offline Operations Dashboard

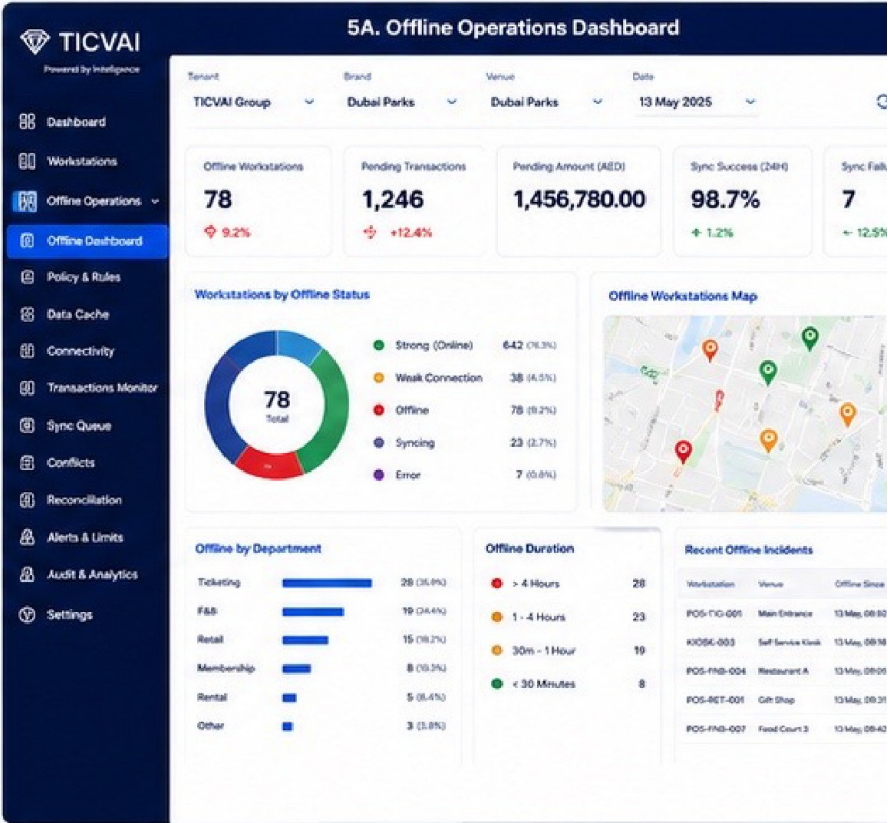

Figure 25 | Offline Operations Dashboard

PURPOSE	Provides a live view of offline workstations, cached data, queued transactions and synchronization health.
MAIN FUNCTIONS	Online/offline estate; pending sync; cached products; success rate; affected venues; geographic status; queue volume; incident list; filters and alerts.
OPERATIONAL VALUE	Helps teams understand operational exposure and restore service in priority order.

Offline Policy & Rules Configuration

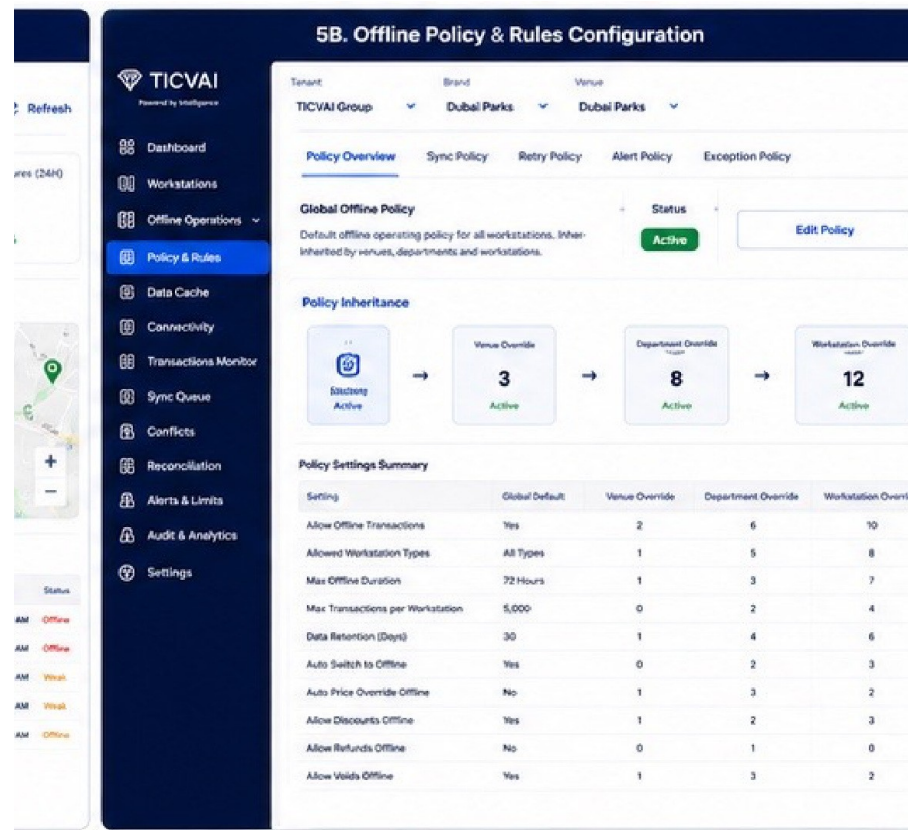

Figure 26 | Offline Policy & Rules Configuration

PURPOSE	Defines when offline mode is permitted and the controls that apply while disconnected.
MAIN FUNCTIONS	Policy name and scope; switch trigger; offline duration; permitted transaction types; value and volume limits; discounts, refunds and cash rules; approval; active status.
OPERATIONAL VALUE	Balances business continuity with financial, inventory and fraud risk.

Offline Product & Data Cache Management

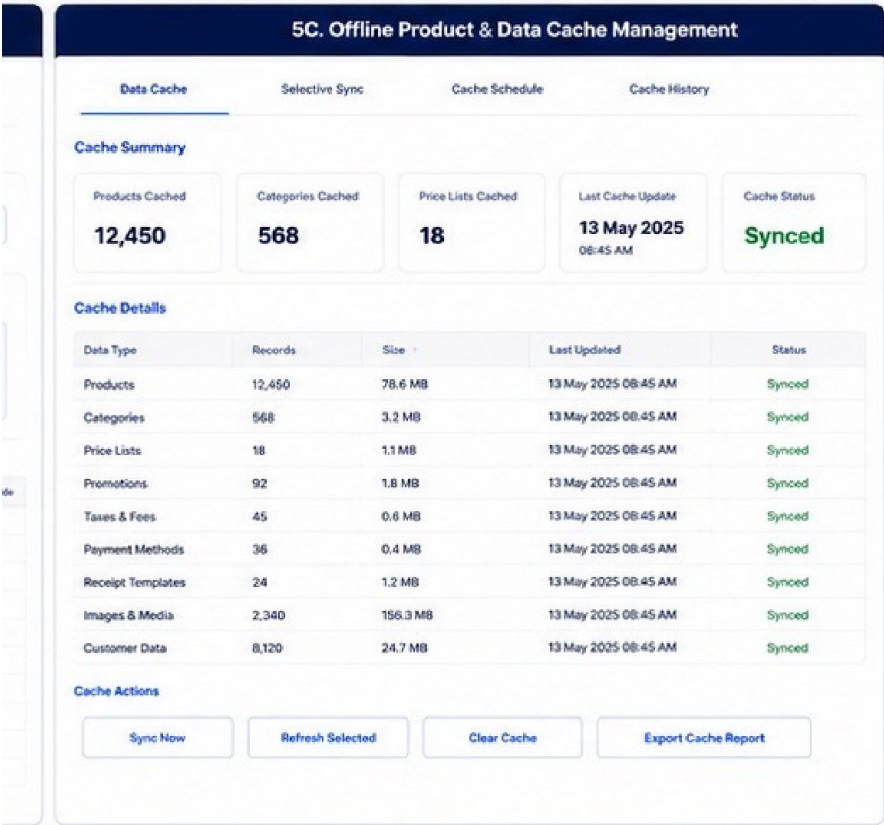

Figure 27 | Offline Product & Data Cache Management

PURPOSE	Controls the product, price and configuration data available locally when the central platform is unavailable.
MAIN FUNCTIONS	Cache summary; products and categories; prices and promotions; memberships or entitlements; version; last update; expiry; synchronization status; refresh, clear and export actions.
OPERATIONAL VALUE	Ensures offline selling uses an approved, current and traceable data set.

Connectivity & Auto-Switch Settings

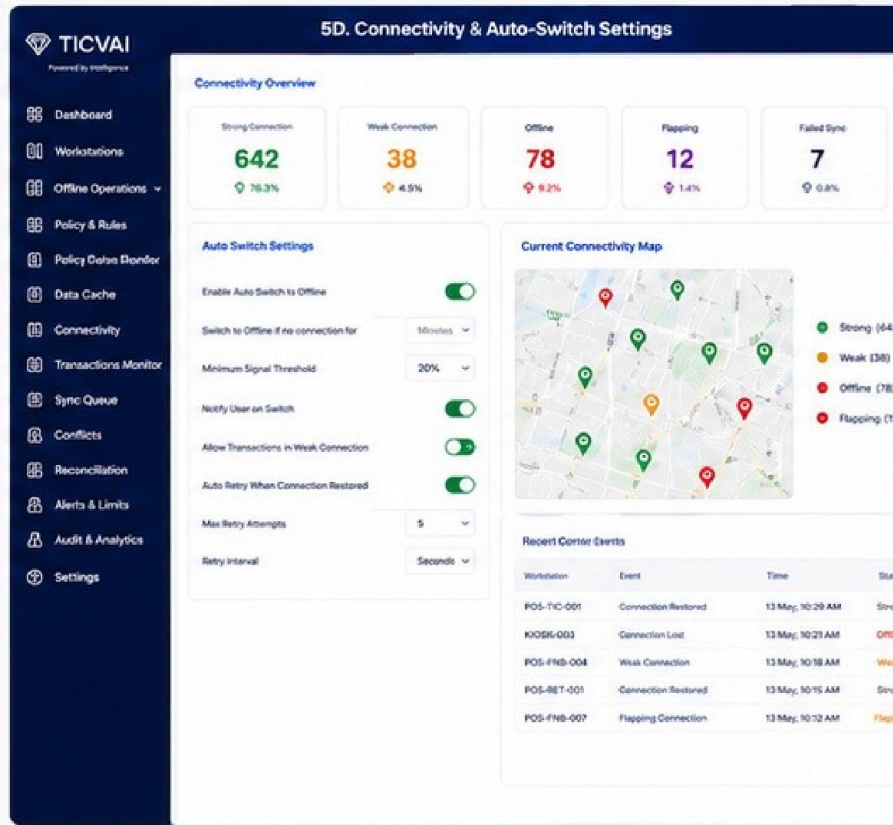

Figure 28 | Connectivity & Auto-Switch Settings

PURPOSE

Monitors connectivity and configures automatic transition between online and offline operation.

MAIN FUNCTIONS

Workstation status; heartbeat; latency; switch thresholds; retry rules; network map; recovery behavior; recent switch events; manual override; synchronization trigger.

OPERATIONAL VALUE

Supports a smooth transition without duplicate transactions or uncontrolled manual intervention.

Offline Transaction Monitor & Sync Queue

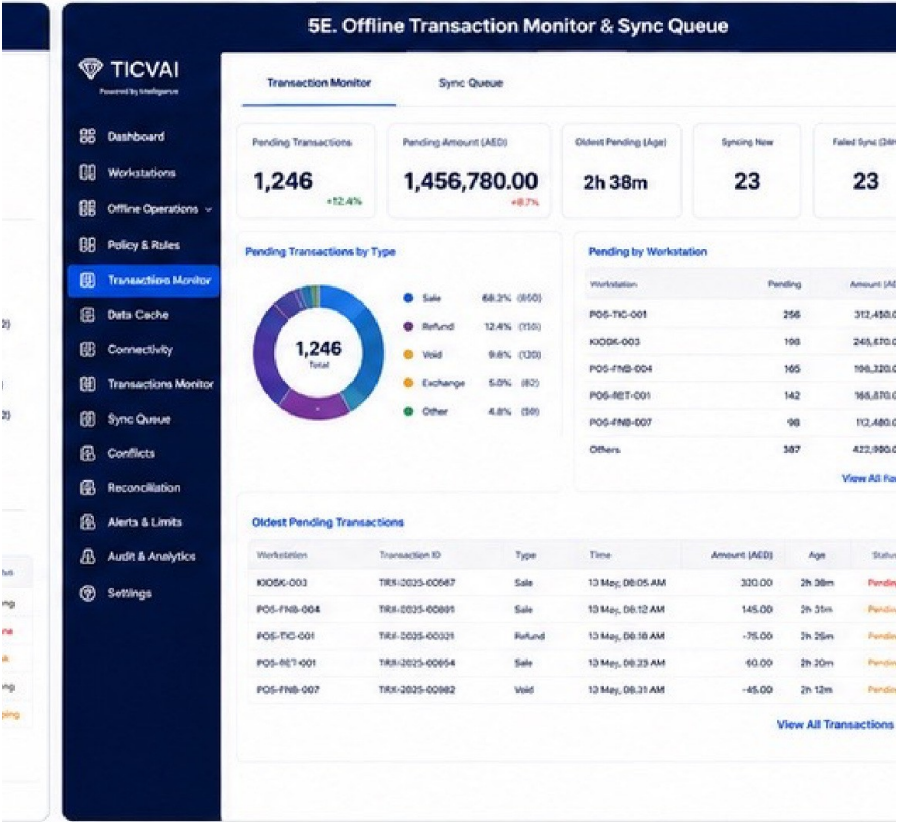

Figure 29 | Offline Transaction Monitor & Sync Queue

PURPOSE	Tracks locally captured transactions and manages their return to the central platform.
MAIN FUNCTIONS	Queued, synced, failed and duplicate transactions; amount and payment method; workstation and operator; attempt count; error; retry; conflict handling; recent audit trail.
OPERATIONAL VALUE	Provides recoverability and end-to-end traceability for every offline transaction.

Offline Alerts, Limits & Audit

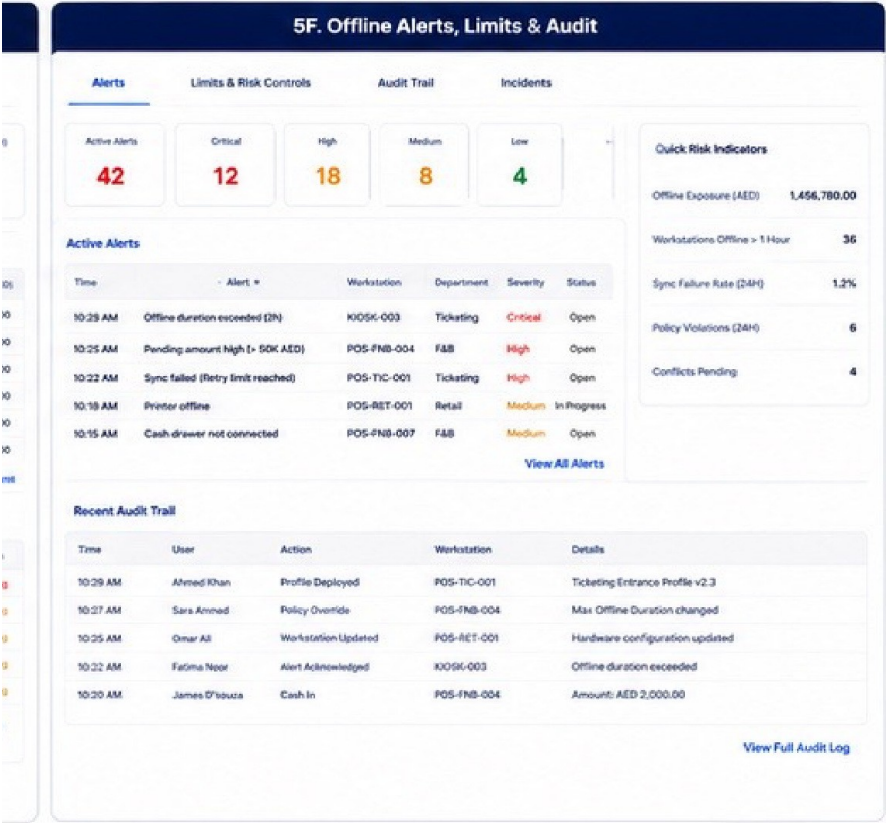

Figure 30 | Offline Alerts, Limits & Audit

PURPOSE

Centralizes offline risk alerts, thresholds, exceptions and historical evidence.

MAIN FUNCTIONS

Active alerts; failed synchronization; policy breaches; value and duration limits; severity; affected workstation; response status; recent audit events; export and investigation actions.

OPERATIONAL VALUE

Allows supervisors and Finance to act on exceptions while preserving evidence for reconciliation and review.

BOARD 6

Enterprise Frontline Operations & Analytics

Provides consolidated operational oversight from enterprise to venue, department, workstation and transaction level.

Board outcomes

Provide enterprise-to-transaction visibility; connect performance with technical health and exceptions; surface explainable AI insights.

Included screens

- 6A | Enterprise Frontline Operations Dashboard
- 6B | Venue Operations Dashboard
- 6C | Department & Sub-Department Dashboard
- 6D | Workstation Operations Dashboard
- 6E | Transaction & Exception Monitoring
- 6F | Frontline Analytics, AI Insights & Audit

Enterprise Frontline Operations Dashboard

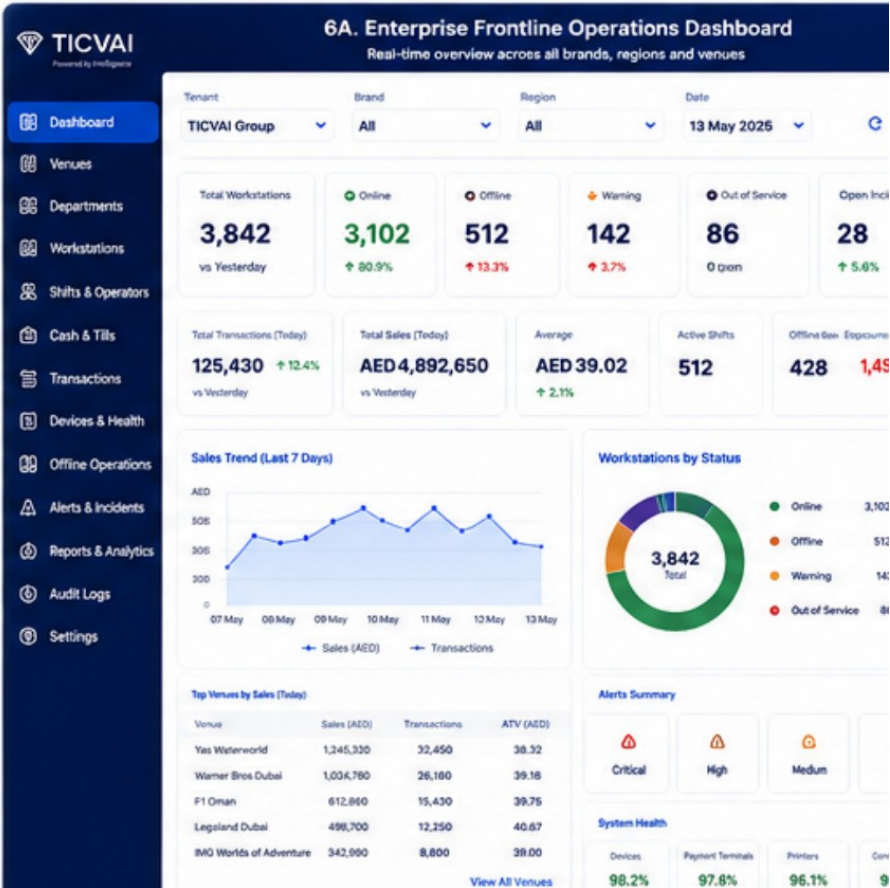

Figure 31 | Enterprise Frontline Operations Dashboard

PURPOSE	Presents the executive view of frontline performance across companies, regions and venues.
MAIN FUNCTIONS	Total and active workstations; transactions; sales; alerts; staff; sales trend; payment distribution; venue comparison; channel mix; health score; filters.
OPERATIONAL VALUE	Supports executive monitoring and rapid comparison of operational performance across the enterprise.

Venue Operations Dashboard

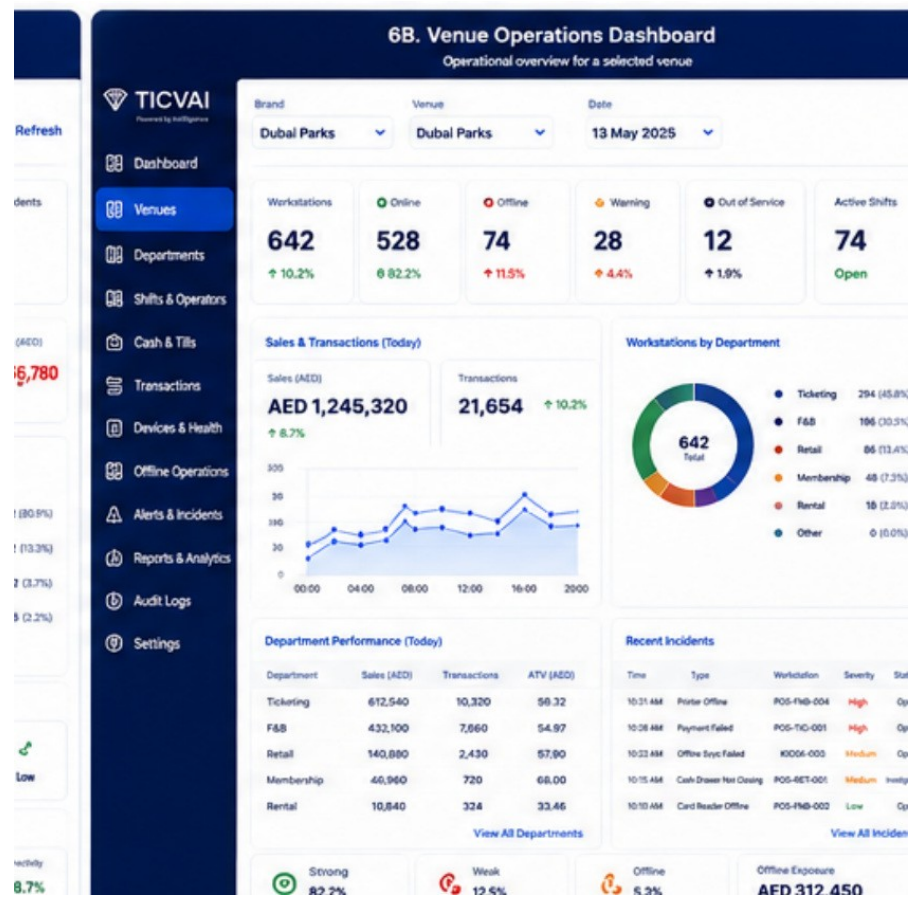

Figure 32 | Venue Operations Dashboard

PURPOSE	Focuses on the health, sales, staffing and exceptions of a selected venue.
MAIN FUNCTIONS	Venue KPIs; sales and transaction trends; workstation status; department performance; payment mix; recent incidents; top operators; utilization and health.
OPERATIONAL VALUE	Helps venue management connect commercial results with frontline capacity and technical readiness.

Department & Sub-Department Dashboard

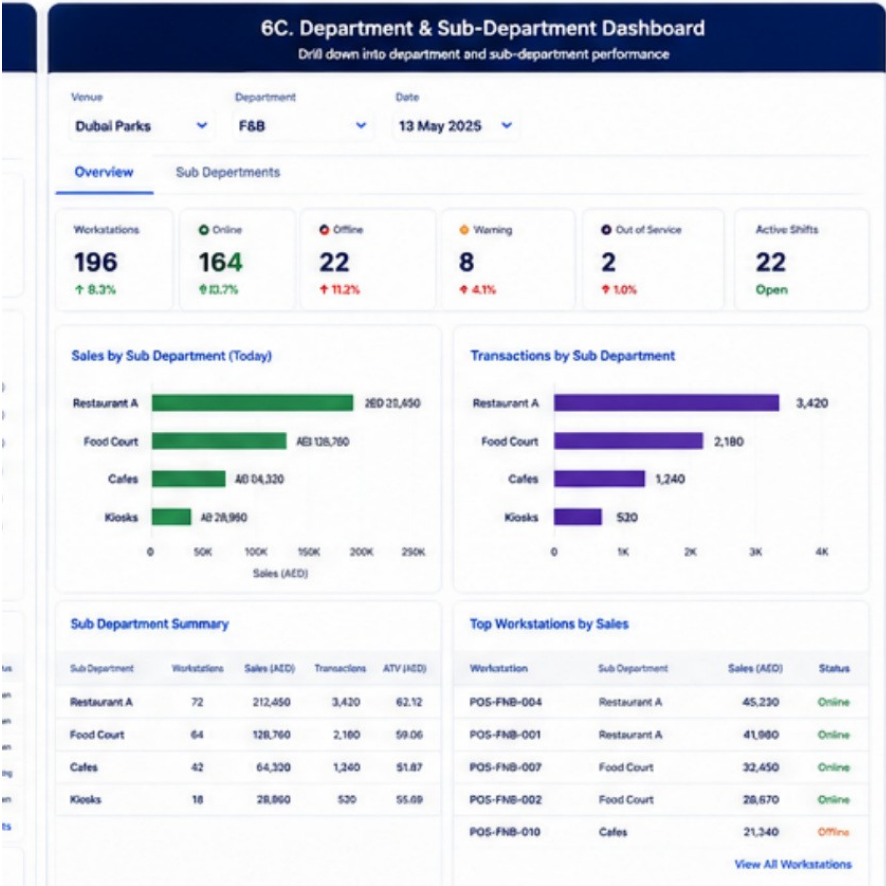

Figure 33 | Department & Sub-Department Dashboard

PURPOSE

Breaks venue performance down by department and operating unit.

MAIN FUNCTIONS

Workstations; online/offline and alert status; transactions; sales; departmental comparison; revenue by sub-department; exceptions; utilization; performance summary.

OPERATIONAL VALUE

Enables managers to isolate operational issues and compare units with similar responsibilities.

Workstation Operations Dashboard

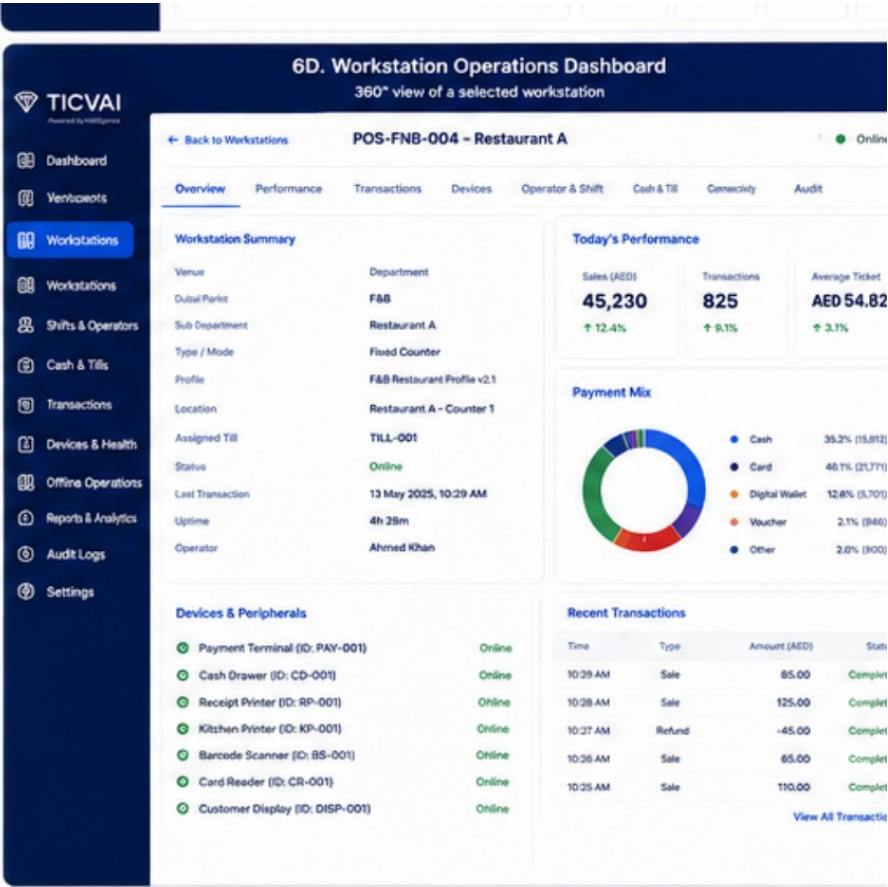

Figure 34 | Workstation Operations Dashboard

PURPOSE	Provides a detailed operational profile for a selected POS workstation.
MAIN FUNCTIONS	Workstation identity and hierarchy; transactions; sales; current shift and operator; payment mix; transaction type; device and peripheral health; recent activity.
OPERATIONAL VALUE	Creates a single drill-down point for operational, financial and technical investigation.

Transaction & Exception Monitoring

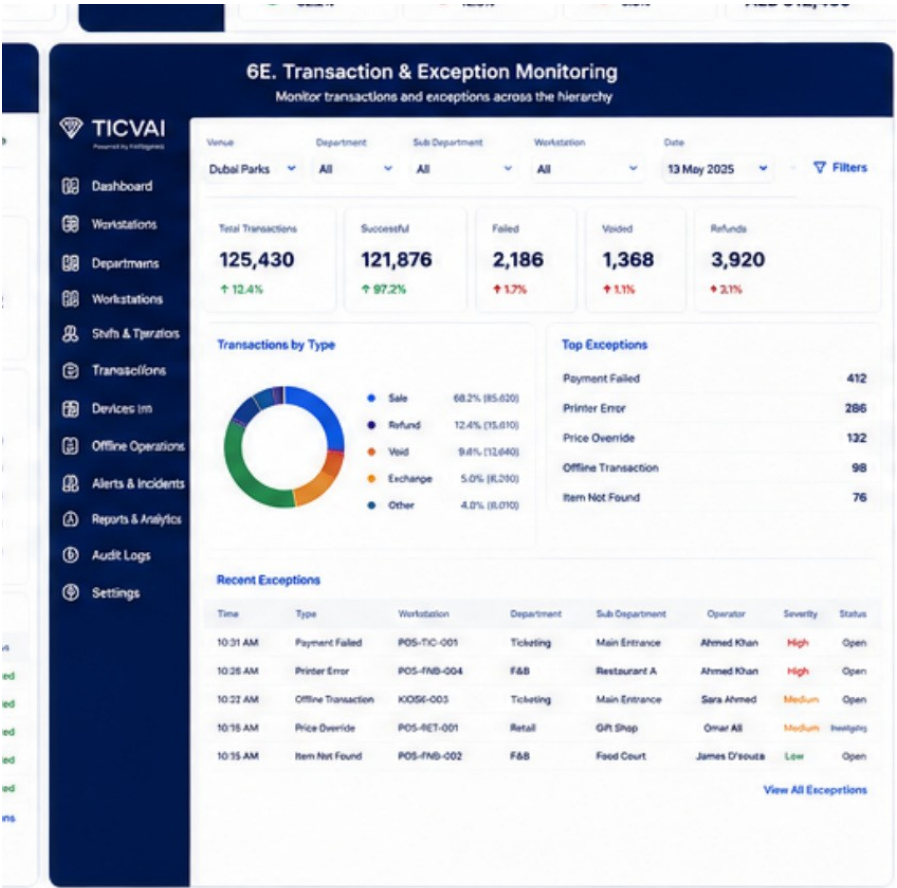

Figure 35 | Transaction & Exception Monitoring

PURPOSE

Monitors transactions and risk indicators across the frontline estate.

MAIN FUNCTIONS

Total transactions and sales; refunds, voids and discounts; payment mix; transaction types; exception counts; trend; detailed transaction records; filters and investigation drill-down.

OPERATIONAL VALUE

Surfaces unusual activity quickly and supports controlled review without losing source context.

Frontline Analytics, AI Insights & Audit

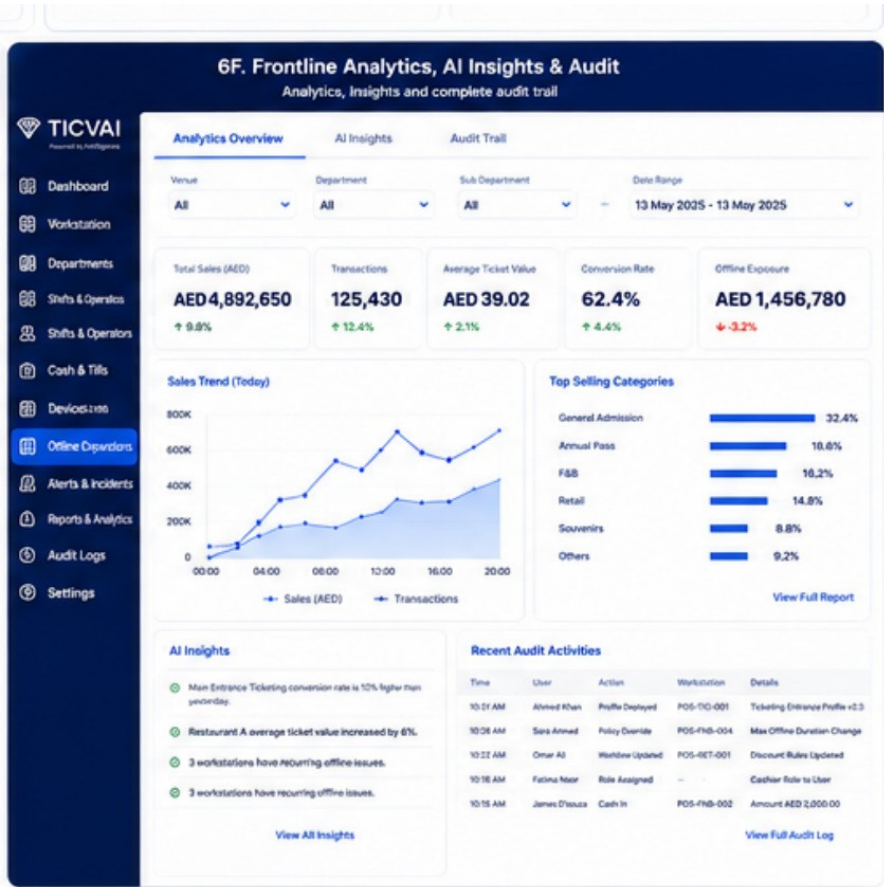

Figure 36 | Frontline Analytics, AI Insights & Audit

PURPOSE

Combines analytical trends, explainable AI insights and governance records.

MAIN FUNCTIONS

Performance KPIs; sales trend; selling category; system health; AI-generated insights; recommended actions; recent audit activity; exception patterns; filters and export.

OPERATIONAL VALUE

Turns operational data into prioritized insight while keeping approvals and final decisions with authorized users.
